

Job Safety Training Outline

Built to align with DAFI 91-202 paragraph 14.1 requirements.

Unit: 156th Wing

Work Center: Wing Staff Agencies / Comptroller Flight

Work Area / Office Symbol: WSA_CPTF

Phone: 253-9587

Supervisor: Maj Ernesto Ayala, CPTF Commander

Reviewer: MSgt Raphael Medina

Review Date: 2026-07-21

Effective Date: 2026-07-21

Work Center Overview

The 156th Wing Staff Agencies (WSA) and the 156th Comptroller Flight (156 CPTF) serve as the executive decision-making, regulatory, and financial foundation of the 156th Wing, Puerto Rico Air National Guard (PRANG) based out of Muñiz Air National Guard Base, Carolina, Puerto Rico.

Working directly in support of the Wing Commander, these sections maintain military readiness, safeguard resources, protect civil liberties, and manage base-wide operations.

Work Area Hazard Analysis / JHA Notes

Primary work hazards include:

- Office ergonomics, including repetitive-motion, workstation, and manual-material-handling hazards.
- Slips, trips, and falls from cords, wet floors, uneven surfaces, stairways, ladders, and elevated work.
- Electrical hazards associated with office equipment, power strips, damaged cords, and unauthorized equipment.
- Fire, evacuation, severe weather, and emergency response hazards.
- Cleaning chemical exposure, including disinfectants, bleach, and other common-area cleaning products.
- Noise, flying debris, high-pressure water, chemical splash, vibration, and struck-by hazards when personnel volunteer or are assigned lawn-care, pressure-washing, facility-maintenance, or similar support tasks.
- Vehicle, pedestrian, bicycle, parking-lot, and flight-line hazards when performing duties outside the office area.

Applicable guidance and references:

Employees will follow applicable technical orders, job guides, manufacturer instructions, Safety Data Sheets (SDS), approved work instructions, job orders, risk-management documentation (Deliberate Risks Assessment Worksheets), and Job Hazard Analyses (JHAs), when applicable.

Required Training Topics

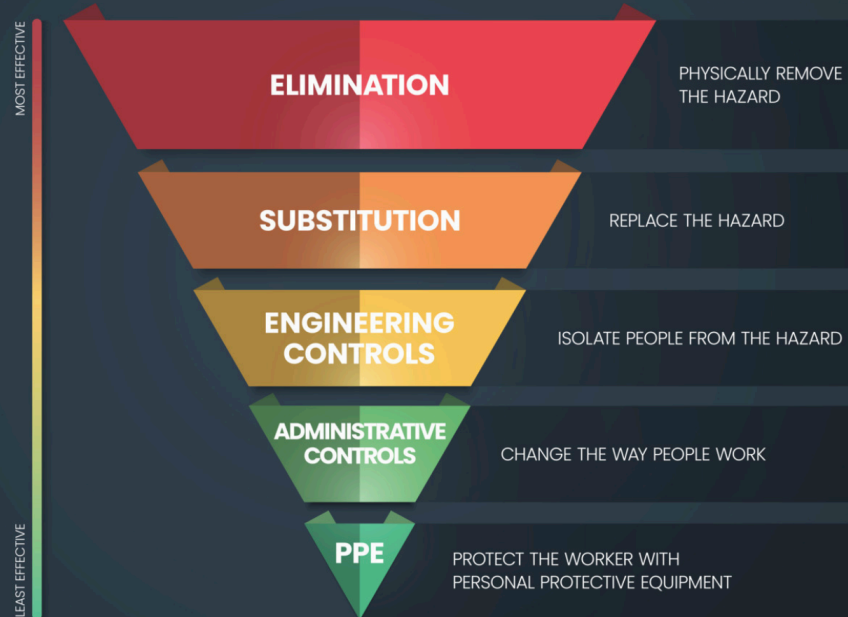

Workplace Hazards
Personal Protective Equipment
Emergency Action and Fire Prevention
Reporting Unsafe Equipment, Conditions, or Procedures
Mishap, Occupational Injury, and Illness Reporting
CA-10 and LS-201
DAF Traffic Safety Program
DAFVA 91-209 Location and Content
DAFSMS Responsibilities

- **Workplace hazards:** Describe crushing, burn, chemical, ladder, weather, flight line, and noise hazards specific to the work center, plus the technical orders, JHAs, and instructions workers must follow.
- **Personal protective equipment:** Train employees on required PPE, including donning, doffing, cleaning, maintenance, storage, disposal, and reporting contact-lens or medical issues that could affect wear.
- **Emergency action and fire prevention:** Cover alarms, AEDs, extinguishers, evacuation routes, shelter locations, and response procedures tied to the work center.
- **Reporting unsafe conditions:** Instruct personnel to report unsafe equipment, conditions, procedures, and injuries without fear of reprisal, including use of DAF Form 457 and applicable reporting channels.
- **Mishap / injury / illness reporting:** Explain on-duty and off-duty reporting requirements, medical treatment procedures, and emergency response contacts.
- **Traffic safety:** Brief seat belt, speed limit, spotter, electronic device, and motorcycle safety requirements applicable to the work center.
- **DAFVA 91-209 and DAFSMS:** Review the location of DAFVA 91-209 and how workers contribute to the unit safety management system.

Hierarchy of Controls

Apply these controls from most effective to least effective when reducing workplace hazards under DAFI 91-202 paragraph 14.1.2.1.4.

HIERARCHY OF **HAZARD CONTROLS**

Use the highest level of control feasible first. PPE should protect workers only after elimination, substitution, engineering, and administrative controls have been considered.

Active Shooter Response

In the event of an active shooter, individuals should employ the **Avoid, Deny, Defend** response method. This strategy is adaptable to the specific situation and environment.

Responses to an Active Shooter include:

Avoid (RUN),

Deny (HIDE),

Defend (FIGHT)

Adapt your response to the weapons used:

Ricocheting bullets

Shrapnel and secondary missiles

Cover vs Concealment

An active shooter situation may be over within 15 minutes, before law enforcement arrives.

Avoid (Run): The first and preferred course of action is to evacuate the area if a safe route is available. Maintain awareness of your surroundings and have an escape route planned. Leave your belongings, evacuate regardless of whether others follow, and do not attempt to move wounded people. Once you have reached a safe location, call 911 and provide any information you have.

Deny (Hide): If you cannot evacuate, your next priority is to deny the attacker access to your location. This involves more than just hiding; it means securing your position. Lock and blockade doors with heavy furniture, turn off lights, silence your phone, and remain out of the shooter's view. Remember that concealment only hides you, while cover can offer protection from bullets.

Defend (Fight): As a last resort, when your life is in immediate danger, you must be prepared to defend yourself. Act aggressively, improvise weapons from your surroundings, and commit fully to your actions. Taking action may be risky, but it could be your best or only chance for survival.

When law enforcement arrives: Remain calm, follow all instructions, keep your hands visible with fingers spread, and be prepared to provide information about the shooter's location, number, and description.

DAFSMS Framework

DAFSMS uses four pillars and the DAFSMS framework to structure the mishap prevention program through continuous improvement and the Plan-Do-Check-Act model.

Policy and Leadership

Safety policy provides the structure for a proactive mishap prevention program. Active leadership involvement at every level is critical to implementation and sustained execution.

Risk Management

Integrate risk management into all safety-related activities so hazards are identified early, controls are implemented, and the safety culture stays proactive.

Assurance

Use evaluations, monitoring, and review processes to measure conformance to standards and drive continuous improvement across the mishap prevention program.

Promotion, Education, and Training

Provide safety awareness, embed ongoing training, implement effective controls, and keep airmen and guardians actively engaged in mishap prevention.

Department of the Air Force SMS Framework

Policy and Leadership

- Leadership planning, organization, direction, and control

- Management roles, responsibilities, and relationships
- Procedures and controls that are developed, documented, maintained, and monitored
- Safety and quality balance, integration, and goal setting

Risk Management

- Hazard identification through mission/task analysis and hazard lists
- Hazard assessment using exposure, probability, severity, and risk level
- Control options, effects, prioritization, selection, and decisions
- Implementation, communication, accountability, support, supervision, and feedback

Assurance

- Performance requirements, expectations, and control effectiveness
- Continuous monitoring, self-inspections, internal and external inspections
- Mishap and event investigation, reporting, metrics, and improvement opportunities
- Change management and continuous improvement actions

Promotion, Education, and Training

- Culture built on informed, flexible, learning, just, and reporting behaviors
- Competency through training and education
- Awareness through internal communication, external communication, and information access

Job Specific Training Items

The following modules apply to this work center and should be reviewed with trainees before task performance.

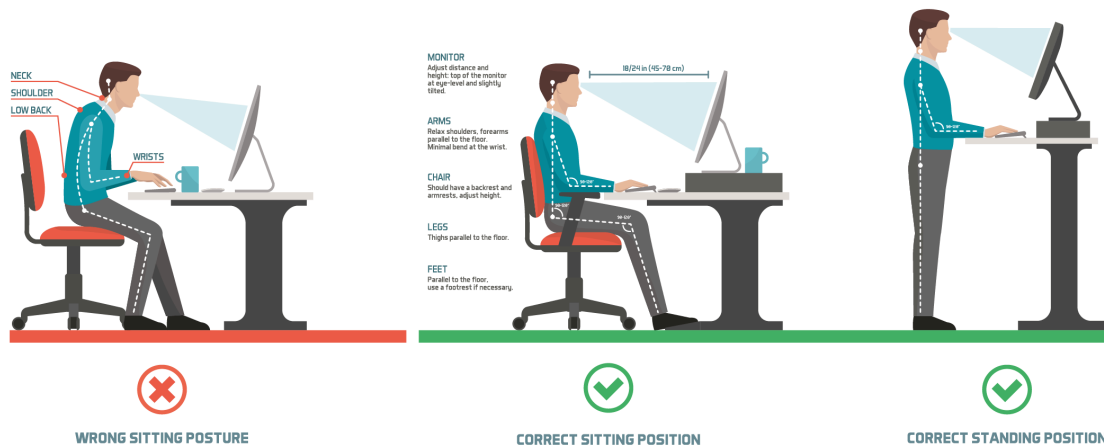

Personal Protective Equipment (PPE)Fetal Protection Program

- **Personal Protective Equipment (PPE):** Personal Protective Equipment (PPE): Personnel will use PPE required for their assigned task. Supervisors will ensure workers are trained on the correct selection, fitting, donning, doffing, cleaning, maintenance, storage, inspection, and disposal of PPE before task performance. Workers who wear contact lenses, have medical conditions, or take medications that may affect PPE use or wear must notify their supervisor immediately. Task-specific PPE may include hearing protection, eye/face protection, gloves, protective footwear, and other PPE for lawn equipment, pressure washing, cleaning chemicals, spill response, and facility-support tasks. Personnel will not perform a task requiring PPE until required PPE is available, serviceable, and properly fitted. This section details the specific ****Lawn Care & Pressure Washing PPE**** guidelines and ****Cleaning Chemical PPE**** availability protocols to be included directly in your Job Safety Training Outline (JSTO), aligned with ****DAFMAN 91-203****. □ Task-Specific PPE Guidelines (JSTO Topic Integration) While administrative personnel within the Wing Staff Agencies and CPTF are primarily office-bound, certain groundskeeping, facility maintenance, and common-area cleaning tasks carry specific hazard exposure risks that mandate the use of personal protective equipment (PPE). --- □ 1. Power Lawn Equipment & Pressure Washer PPE: Anytime

personnel operate or assist near high-decibel lawn machinery or high-pressure washers, the following specialized PPE ****must be utilized**** to prevent hearing loss, physical trauma, and eye damage: Hearing Conservation (Ear Protection): Applicability: Mandatory when operating or working in the immediate vicinity of noise-hazardous equipment exceeding ****85 dBA**** (such as lawn trimmers, leaf blowers, and gas-powered pressure washers). Requirement: Use only ****serviceable, clean, and properly fitted**** earplugs or earmuffs. Eye & Face Protection: Lawn Trimmers / Leaf Blowers: High-impact safety glasses or a full-face shield to protect against high-velocity thrown objects (rocks, twigs, and dust). Water Pressure Washers: Sealed safety goggles (to prevent high-velocity water blowback and debris splash). Hand & Foot Protection: Gloves: Heavy-duty leather work gloves to prevent abrasions, severe vibration fatigue, and blisters. Footwear: Sturdy, closed-toe leather boots (steel-toe safety shoes are highly recommended to prevent projectile impact and accidental high-pressure water injection injuries). --- ¶ 2. Office Cleaning Chemicals & Common Areas: Exposure to everyday cleaning agents and disinfectants utilized in break rooms, restrooms, and administrative common areas can cause severe skin irritation, chemical burns, or dermatitis. Hand Protection (Nitrile Gloves): Applicability: Nitrile gloves ****must be worn**** when handling any concentrated or diluted chemical cleaners, bleach, or sanitizing agents. "Why Nitrile": Nitrile provides superior chemical resistance and puncture resistance and does not carry the allergy risks associated with latex. Local Supply & Availability: How to Access: Highly durable, disposable, and chemical-resistant nitrile gloves are readily available at the 156th Wing Safety Office. Action for Staff: - Prior to conducting any deep cleaning, spill response, or common area sanitation, coordinate with the Wing Safety Office or your Facility Manager to obtain your personal safety gloves.

- **Fetal Protection Program:** The Fetal Protection Program addresses potential workplace exposures that may present reproductive or developmental health concerns. For WSA/CPTF personnel, routine office duties are generally low risk; however, employees may occasionally encounter hazards associated with cleaning chemicals, disinfectants, groundskeeping equipment, pressure washing, noise, flying debris, and other facility-support activities. Employees who are pregnant, planning pregnancy, breastfeeding, or who have reproductive-health concerns are encouraged to seek confidential guidance from their healthcare provider and the appropriate installation Occupational Health, Bioenvironmental Engineering, or medical authority. Employees are not required to disclose personal medical information to coworkers. Supervisors will protect privacy and limit information sharing to official need-to-know requirements. Supervisors will not make medical determinations. When an employee provides medical restrictions or requests workplace evaluation, the supervisor will coordinate with the appropriate medical, Occupational-Health, Bioenvironmental Engineering, safety, civilian personnel, and command channels, as applicable. Before employees perform tasks involving chemical cleaners, bleach, disinfectants, lawn equipment, pressure washers, or other potentially hazardous work, supervisors will ensure applicable hazards, Safety Data Sheets, required PPE, and controls are reviewed. Apply the hierarchy of controls—elimination, substitution, engineering controls, administrative controls, and PPE—to reduce exposure. Employees will use required PPE and follow manufacturer instructions, Safety Data Sheets, JHAs, technical guidance, and locally approved work procedures. Employees will immediately report chemical spills, damaged PPE, unsafe conditions, or suspected exposure to their supervisor and follow local emergency and medical-response procedures. When medical restrictions or Occupational-Health recommendations affect assigned duties, the supervisor will coordinate appropriate temporary duty modification, reassignment, or other action through the established local process. For more information, contact the 156TH Wing Staff Agencies_Comptroller Flight Unit Health Monitor, MSgt Raphael Medina at 253-9587 (Primary UHM) or SSgt Karielys Velez at 253-9205 (Alternate UHM).

Ergonomics Workstation Posture Guide:

Use this guide while briefing office and administrative workstation setup.

Emergency Information

- **Emergency Numbers:** Emergency Services: 911

BDOC: 787-253-5204 or 787-253-5177

Command Post: 787-253-7405

- **Medical Facility / Treatment:** □ Emergency Medical Care Guide
Initial Emergency Assessment:

Is this a Medical Emergency? (Life, limb, or eyesight-threatening condition).

If NO:

Contact the 156th Medical Group (Muñiz PR ANG) immediately.

MDG Main Lines: (787) 253-5124 or (787) 253-5192

Medical Administrator Officer: (787) 253-7594

If YES:

Proceed directly to the nearest Emergency Room (ER).

No pre-authorization is required for emergency care.

Military Duty Status Verification:

* YES (In Military Status - Drill/Orders): Go to the nearest Emergency Room. Your First Sergeant (1st Sgt) or Senior Enlisted Leader (SEL) must notify the 156 MDG ASAP.

* NO (Not in Military Status): Follow your standard civilian health insurance medical coverage.

□ Local TRICARE Network Emergency Facilities

Hospital UPR Dr. Federico Trilla

Address: Km 8.3 Carretera 3 (PR-3), Ave 65 Infanteria, Carolina, PR 00984

Phone: (787) 757-1800

Distance from Base: 4.8 miles

Doctors Center Carolina

Address: Edificio Jesus I. Pinero, Apartado 8, Carolina, PR 00986

Phone: (787) 626-3322

Distance from Base: 5.1 miles

Ashford Hospital

Address: 1451 Ashford Avenue, San Juan, PR

Phone: (787) 721-2160

Distance from Base: 7.7 miles

□ Mandatory Post-Emergency Administrative Steps
Required Documentation Checklist:

Certified RSD Roster (ANG Form 633)

Official Medical Evaluation (discharge papers/clinical summaries)

Clinical Diagnosis & subsequent Treatment Plan

Supervisor Mishap Report (AF Form 978)

Official Submission Portal:

All collected medical and administrative documents must be submitted digitally through the secure MHS GENESIS Patient Portal.

Document Authority: Version 1.0 (23 Apr 2026) — Prepared by MSgt Ixcia Estrada

Emergency Mental Health Decision Flow for Military Members

Start: Is this a mental health emergency? The chart defines this as a risk of harm to self or others.

Yes: Verify military status and go to the nearest behavioral health facility.

No: Contact the 156th Medical Group.

Verify military status

In military status: Go to the nearest behavioral health facility. No pre-authorization is needed for emergencies. The 1st Sgt / SEL must notify the 156 MDG as soon as possible.

Not in military status: Follow applicable civilian mental health coverage.

Contact the 156th Medical Group

Main numbers: (787) 253-5124 / 253-5192

Medical Administrator Officer: (787) 253-7594

TRICARE network facilities

Hospital UPR Dr Federico Trilla — Carr. 3 KM 3, Carolina, PR 00984; (787) 757-1800; 4.1 miles from Base Muñoz Carolina.

First Hospital Panamericano — Torre Auxilio Mutuo; (787) 623-1300; 8.2 miles.

Clinica de Servicios Ambulatorios Hospital San Juan Capestrano — Carretera Estatal 877, Km 1, San Juan, 00926; (787) 625-2940.

San Juan VA Medical Center — 10 Calle Casia, San Juan, PR 00921-3201; (787) 622-4822.

Documentation submission:

Submit all documentation through the MHS GENESIS Patient Portal.

Required post-emergency actions:

Certified RSD Roster (ANG Form 633).
Supervisor Mishap Report (DAF Form 978), or equivalent documentation.
Medical evaluation progress notes, diagnosis, and treatment plan.

Additional notes:

The chart notes: "Service-connected members / TRICARE insurance authorization."

For urgent assistance, contact the 156th Medical Group immediately.

• **Evacuation / Muster Point:** WING HEADQUARTERS BLDG# 22 FIRE EVACUATION PLAN:

ACTION TO BE TAKEN UPON DISCOVERY OF FIRE IN THIS BUILDING OR IMMEDIATE AREA

SOUND FIRE ALARM AIR HORNS NEAR FIRE EXTINGUISHERS.

IMMEDIATELY GO TO NEAREST TELEPHONE AND CALL FIRE DEPT (OFF-BASE): 911

MAKE EFFORTS TO CONTROL THE FIRE WITH EXTINGUISHER AVAILABLE UNTIL FIRE DEPARTMENT PERSONNEL ARRIVE.

NOTIFY BUILDING MANAGER AS SOON AS POSSIBLE AT TEL: 787-253-5271 or 787-253-5278.

ALL PERSONNEL WILL IMMEDIATELY EVACUATE THE BUILDING (UNLESS ADVISED IN ADVANCE OF WORK/TESTING).

MUSTER POINT IS: SOUTHSIDE OF BUILDING 11.

ACCOUNT FOR ALL PERSONNEL AT ASSEMBLY POINT AND REPORT TO BDOC AT TEL: 787-253-5204 or COMMAND POST AT TEL: 787-253-7405.

ENSURE PERSONNEL WITH HEARING OR SIGHT PROBLEMS KNOW THEY ARE TO EVACUATE - ASSIGN SOMEONE TO ASSIST THEM AND REPORT TO DESIGNATED ASSEMBLY POINT.

BLDG. # 80 FIRE EVACUATION PLAN

ACTION TO BE TAKEN UPON DISCOVERY OF FIRE IN THIS BUILDING OR IMMEDIATE AREA

SOUND FIRE ALARM.

IMMEDIATELY GO TO THE NEAREST TELEPHONE AND CALL THE FIRE DEPARTMENT:

(A) DURING NORMAL WORKING HOURS, ANG TEL: 911

(B) DURING OFF DUTY HOURS, PRPA TEL: 787-791-0224

MAKE EFFORTS TO CONTROL THE FIRE with extinguishers available until the arrival of Fire Department personnel.

ALL PERSONNEL WILL IMMEDIATELY EVACUATE THE BUILDING (unless advised in advance of scheduled maintenance/testing of the alarm system).

ACCOUNT FOR ALL PERSONNEL at the designated ASSEMBLY POINT (BLDG. 80 PARKING

LOT) and report accountability to BDOC at 787-253-5177 or the Command Post at 787-253-7405.

NOTIFY THE BUILDING MANAGER & BDOC as soon as possible:

(A) BUILDING MANAGER OFFICE: 253-9624

(B) BDOC: 253-9204 or 787-253-5177

- **Shelter in Place:** Building 22, Room 111, Public Affairs Office:
-Take immediate cover in designated Shelter-in-Place room until "All Clear" is given by MANGB Command Post. Conduct and provide personnel accountability along with ability assessment to Unit Control Center. Complete your unit or flight-specific checklists.
- **Active Shooter Response Methods:** In an active shooter emergency, it is critical to remain calm and take the most reasonable action to protect your life.

Run (Escape): If a safe route is available, evacuate immediately. Leave belongings behind, help others if possible, and call 911 or the local equivalent once safe.

Hide (Barricade): If evacuation is not possible, move out of view, lock or block doors, turn off lights, silence devices, and remain quiet.

Fight (Take Action): Only as a last resort, when life is in imminent danger, attempt to disrupt or incapacitate the threat. (Use whatever means possible to overpower the shooter and save your life)

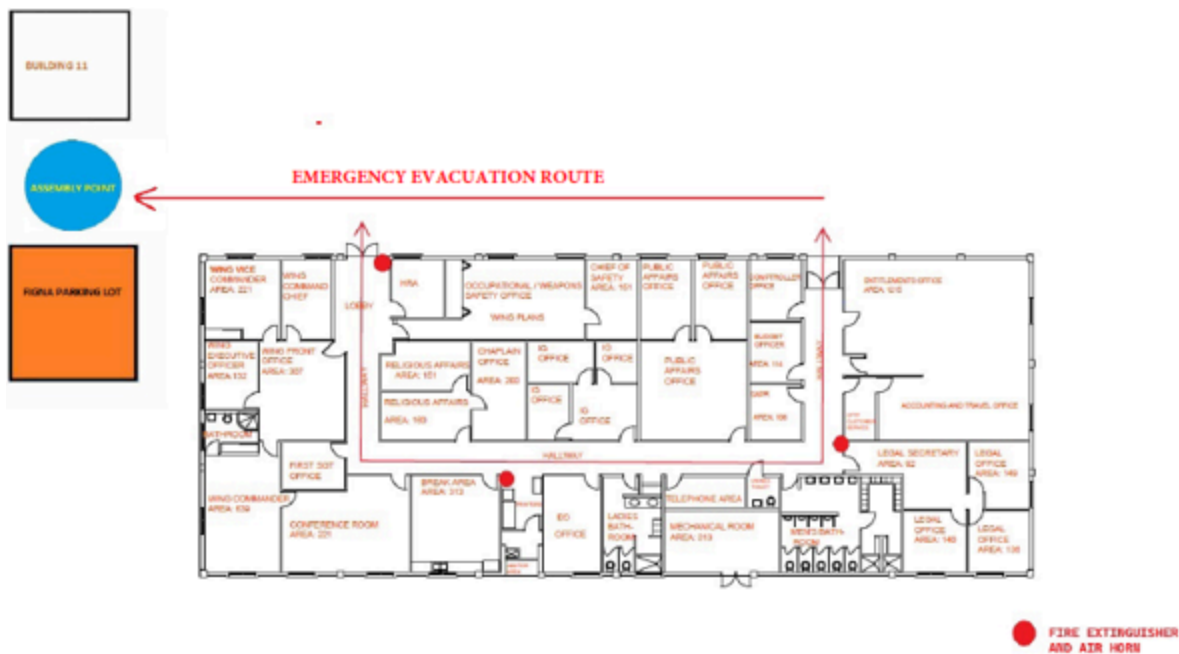

Always follow directions and comply with law-enforcement instructions, keep hands visible, and proceed to the designated assembly area when directed.

When reporting information to the authorities, provide the threat's location, description, weapons, number of individuals involved, and potential victims if known.

At all times, follow local lockdown and emergency-notification procedures.

- **Adverse Weather Shelter:** Cease all outside/exterior operations and take shelter inside until the "all clear" is given by MANGB Command Post.

Emergency Evacuation Route Image:

Traffic Safety Program

DAF Traffic Safety Program (DAFI 91-207): Train personnel on mandatory use of seat belts and helmets, speed limits, local traffic hazards, spotters while backing, vehicle training requirements, and restrictions on electronic device use while operating vehicles on- or off-base.

Seat Belts / Occupant Restraints: All persons operating or riding in motor vehicles must wear installed restraint systems as prescribed by the manufacturer. Drivers are responsible for ensuring all passengers are briefed on and use required restraints.

Motorcycle / ATV Training: Personnel must complete required safety training before riding a motorcycle, and local units should address required PPE, licensing, refresher training, and safety representative contacts.

Pedestrian / Bicycle Awareness: Emphasize local roadway crossing hazards, visibility requirements, spotter use, and other pedestrian or bicycle precautions specific to the installation.

Local Traffic Hazards / Vehicle Notes:

Speed limits on base are 25 mph or as posted.

In Puerto Rico, seatbelts are mandatory.

Intersection of Jose (Tony) Santana Ave. & Road 190 (Near Burger King) is a high crash area.

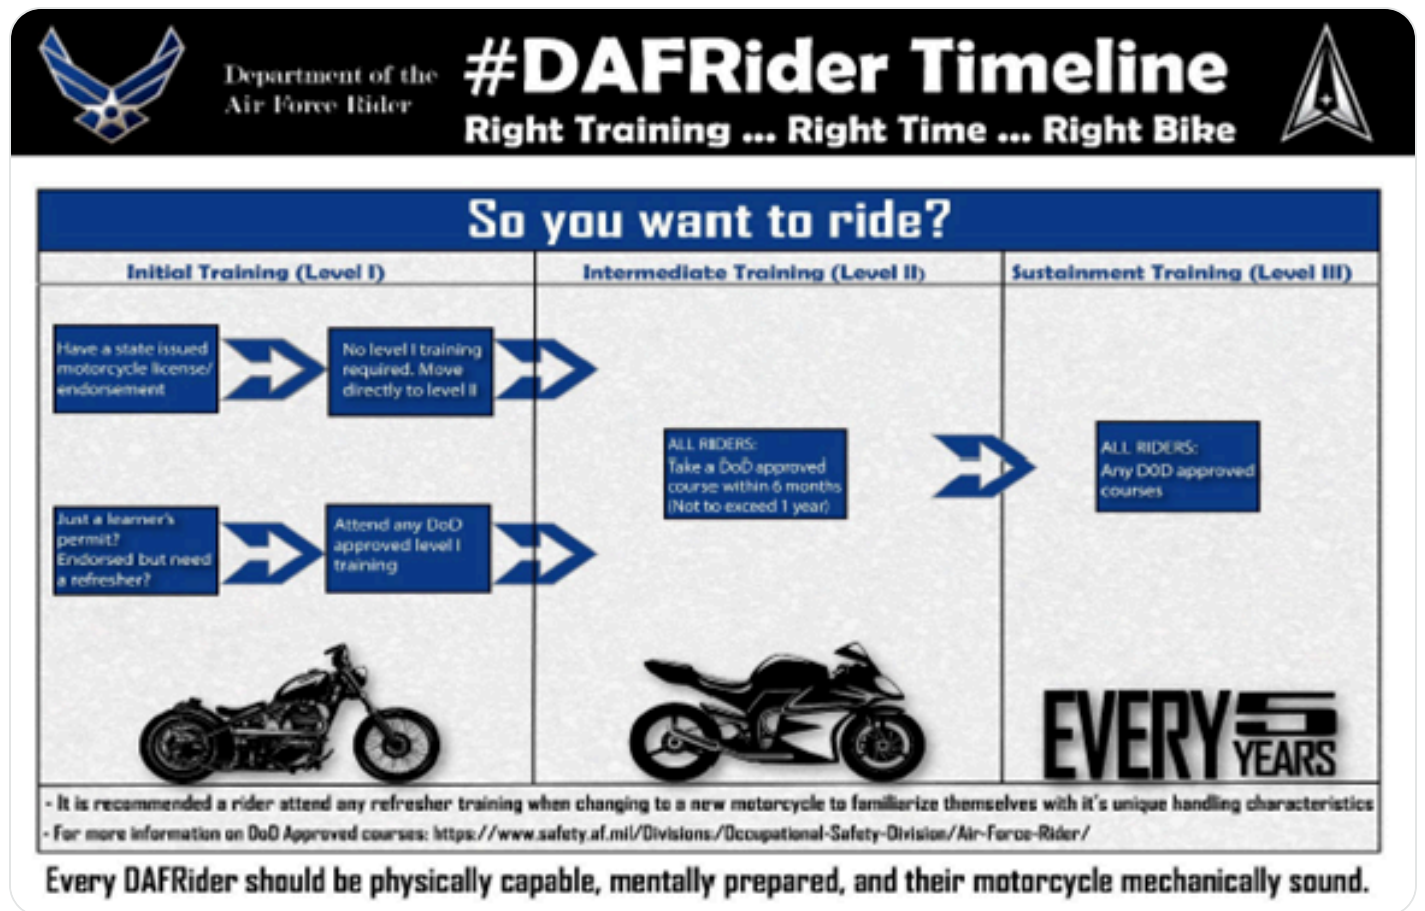

Do not expect other vehicles to yield as required.

The use of electronic devices while operating any vehicle is restricted to hands free only, IAW DAFI 91-207 and applicable State Laws.

Motorcycle Safety Representatives / Traffic Contacts:

Primary Motorcycle Safety Rep.: Maj Isaias Rivera Ocasio

Alternate Motorcycle Safety Rep.: TSgt Irving Morales Llanos

No routine-use GVO risk assessment files uploaded.

Reporting Unsafe Equipment, Conditions, or Procedures

Notify the supervisor immediately when unsafe equipment, conditions, or procedures are identified. Personnel may report hazards without fear of retaliation, coercion, discrimination, or reprisal.

- **DAF Form 457:** Use to document and elevate unsafe conditions, equipment, or processes.
- **SAFEREP:** Use the approved mishap or hazard reporting channel for additional reporting when directed by local procedures.

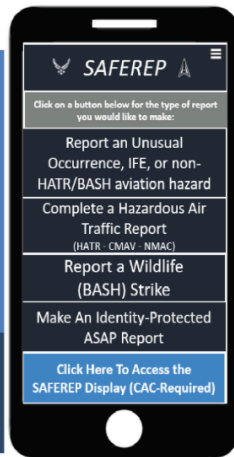

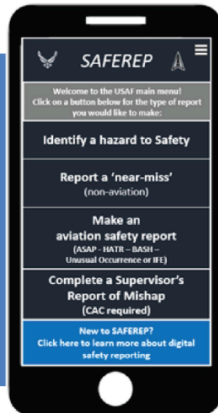

Safety Reporting ... All In One Place

SAFEREP APP!

Why Safety Reporting?

Quickly and easily tell safety about safety issues you see

- In the dorms
- At work
- Anywhere on base
- In flight
- While maintaining aircraft
- On the ramp

What to report?

- Dangerous conditions
- “Near miss” events
- Aviation specific reporting
- Cultural issues that could lead to an accident, damage, or injury
- Supervisor mishap report

Report anonymously
Reports go direct to the safety office

New name, new website, new app, and a whole new look

SAFEREP is a web- and app-based way for members from every career field to identify hazards and report near-misses and even some mishaps directly to their safety offices using any computer or mobile device.

Download to your mobile device
from your preferred App Store

MISHAP REPORTING FLOWCHART

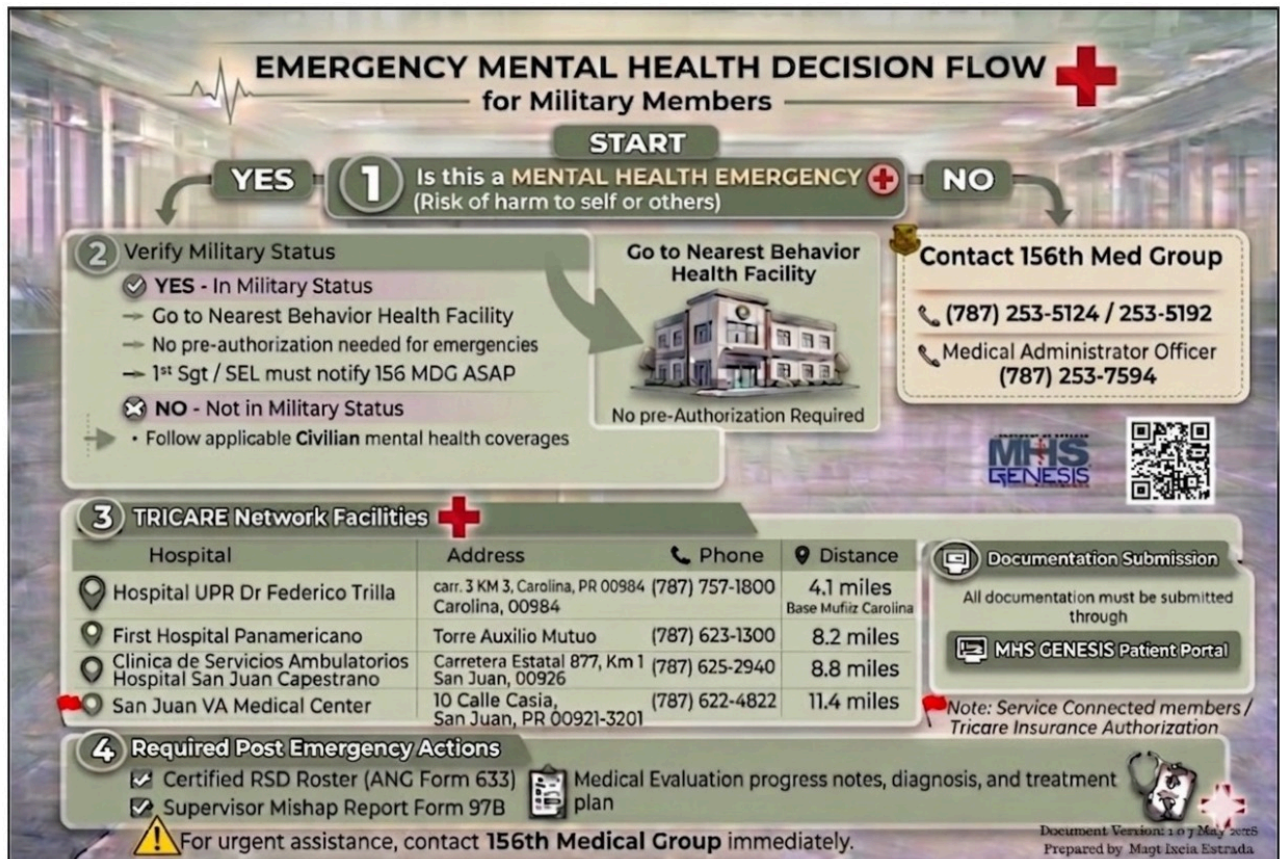

DAF 978 Supervisor Mishap Report Notification Flow

- Mishap Reporting Flowchart.png

DEPARTMENT OF THE AIR FORCE OCCUPATIONAL SAFETY AND HEALTH PROGRAM

The Occupational Safety and Health Act of 1970, Executive Order 12196, and 29 CFR § 1960 require the heads of Federal Agencies to establish programs to protect their personnel from work-related deaths, injuries, and illnesses. The Department of the Air Force Occupational Safety and Health (DAFOSH) program is explained in DAFI 91-202, *The DAF Mishap Prevention Program*.

PROGRAM MANAGEMENT:

- The Deputy Assistant Secretary, Installations, Environment, and Energy (SAF/IE) is responsible for overall direction of the DAFOSH program.
- The Chief, Air Force and Space Force Occupational Safety, Air Force Safety Center (AFSEC/SEG) manages the DAF Occupational Safety program.
- The Air Force Medical Command Aerospace and Occupational Medicine manages the DAF Occupational Health program.
- The Air Force Fire Chief, Air Force Civil Engineer Center (AFCEC/CXF) manages the DAF Fire Emergency Services program.

THE DAF HAS THE RESPONSIBILITY TO:

- Comply with OSHA, DoD, and DAF guidance.
- Set up procedures for submitting and responding to reports of unsafe and unhealthful working conditions.
- Acquire, maintain, and require the use of approved personal protective equipment and safety equipment.
- Inspect all workplaces at least annually with participation by civilian employee representatives.
- Establish procedures to ensure personnel are not subject to restraint, interference, coercion, discrimination, or reprisal for exercising their rights under the DAFOSH program.
- Post notices of unsafe or unhealthful working conditions found during inspections.
- Ensure prompt abatement of hazardous conditions. Personnel exposed to such conditions shall be informed of the abatement plan. Mitigate or abate imminent danger situations immediately.
- Maintain the AF Safety Automated System (AFSAS); the official system for recording occupational mishaps, injuries, illnesses, and their causes.
- Post the civilian Annual Summary of Work-Related Injuries and Illnesses, *OSHA Form 300A*, from 1 Feb through 30 Apr.
- Conduct occupational safety, health, and fire prevention training for all DAF personnel.

DAF PERSONNEL HAVE THE RIGHT TO:

- Participate in the DAFOSH program. Personnel shall be authorized official time to participate in these activities.
- Have access to OSHA and applicable safety, health, and fire prevention guidance.
- Have access to installation occupational injury and illness statistics.
- Comment on alternate guidance proposed by the DAF or their installation.
- Report and request inspections of unsafe or unhealthful working conditions to local safety, health, fire prevention, or other appropriate officials including the Secretary of Labor. However, the Secretary of Labor encourages the use of DAF procedures for reporting a hazardous condition. The DAF Form 457, *Hazard Report*, is used for this purpose. Anonymity is assured if requested.

INDIVIDUALS HAVE THE RESPONSIBILITY TO:

- Comply with OSHA, DoD, and DAF guidance.
- Comply with DAF policies and directives relative to the program.
- Use personal protective equipment and safety equipment provided by their installation.
- Report injuries, job-related illnesses, or other events promptly to their supervisor without fear of coercion, discrimination, or reprisal.

OTHER INFORMATION:

- Reports of hazards will be investigated promptly and the results will be reported in writing to the individual making the report.
- For further information on the DAFOSH program, contact the local officials listed below.
- Failure to carry out your safety, health, or fire prevention responsibilities may result in corrective disciplinary or administrative action.

Releasability: There are no releasability restrictions on this publication.

Prescribing Directive: DAFI91-202

What A Federal Employee Should Do When Injured At Work

Report to Supervisor	Every job-related injury should be reported as soon as possible to your supervisor. Injury also means any illness or disease that is caused or aggravated by the employment as well as damage to medical braces, artificial limbs and other prosthetic devices.
Obtain Medical Care	Before you obtain medical treatment, ask your supervisor to authorize medical treatment by use of form CA-16. You may initially select the physician to provide necessary treatment. This may be a private physician or, if available, a local Federal medical officer/hospital. Emergency medical treatment may be obtained without prior authorization. Take the form CA-16 and form OWCP-1500/HCPA-1500 to the provider you select. The form OWCP-1500/HCPA-1500 is the billing form physicians must use to submit bills to OWCP. Hospitals and pharmacies may use their own billing forms. On occupational disease claims form CA-16 may not be issued without prior approval from OWCP.
File Written Notice	In traumatic injuries, complete the employee's portion of Form CA-1. Obtain the form from your employing agency, complete and turn it in to your supervisor as soon as possible, but not later than 30 days following the injury. For occupational disease, use form CA-2 instead of form CA-1. For more detailed information carefully read the "Benefits ..." and "Instructions ..." sheets which are attached to the Forms CA-1 and CA-2.
Obtain Receipt of Notice	A "Receipt" of Notice of Injury is attached to each Form CA-1 and Form CA-2. Your supervisor should complete the receipt and return it to you for your personal records. If it is not returned to you, ask your supervisor for it.
Submit Claim For COP/Leave and/or Compensation For Wage Loss	If disabled due to traumatic injury, you may claim continuation of pay (COP) not to exceed 45 calendar days or use leave. A claim for COP must be submitted no later than 30 days following the injury (the form CA-1 is designed to serve as a claim for continuation of pay). If disabled and claiming COP, submit to your employing agency within 10 work days medical evidence that you sustained a disabling traumatic injury. If disabled beyond the COP period, or if you are not entitled to COP, you may claim compensation on form CA-7 or use leave. If disabled due to occupational disease, you may claim compensation on form CA-7 or use leave. A claim for compensation for disability should be submitted as soon as possible after it is apparent that you are disabled and will enter a leave-without-pay status.

The Federal Employees' Compensation Act (FECA) is administered by the U.S. Department of Labor, Office of Workers' Compensation Programs (OWCP). Benefits include continuation of pay for traumatic injuries, compensation for wage loss, medical care and other assistance for job-related injury or death. For additional information about the FECA, read pamphlet CA-11, "When Injured at Work" or Federal Personnel Manual, Chapter 810, Injury Compensation, available from your employing agency. The agency will also give you the address of the OWCP Office which services your area.

Documentation and Review

Reference: AFI 91-202_ANGSUP, The US Air Force Mishap Prevention Program

- Paragraph 1.6.28.7.1.

The method of documentation is up to the supervisor, if not otherwise prescribed by the applicable MAJCOM or related chain of authority. Options may include, but are not limited to, the DAF Form 55, Employee Safety and Health Record, electronic mediums such as AFFORMs/CAMs/CAS- B/GO81 or locally developed products. If the DAF Form 55, Employee Safety and Health Record is mandated for use as the training documentation device, the entity that mandated the form usage will prescribe the requirement in writing to include if signatures are required or optional. Regardless of the method chosen, documentation will contain the following minimum data: trainee name (last, first, middle initial), type of training and date of training. Neither the trainer or trainee signature is required unless specified in writing by the applicable chain of authority. NOTE: If the Integrated Maintenance Data System (IMDS), Core Automated Maintenance System (CAMS), etc., cannot support minimum documentation requirements, then they are not suitable as a documentation product.

Bioenvironmental Workplace Survey: No Bioenvironmental Workplace Survey uploaded.
