

Job Safety Training Outline

Built to align with DAFI 91-202 paragraph 14.1 requirements.

Unit: 116 ASOS

Work Center: Not entered

Office Symbol: Not entered

Supervisor: Not entered

Phone: 281-794-8133

Reviewer: Matthew Tasin

Review Date: 2026-05-06

Effective Date: 2026-05-06

WORK CENTER OVERVIEW

This JSTO is all-encompassing for operations and mission support, to include the Command, Integration, C2, Strike, and ISET UTCs.

REQUIRED TRAINING TOPICS

Workplace Hazards

Personal Protective Equipment

Emergency Action and Fire Prevention

Reporting Unsafe Conditions

Reporting Mishaps and Occupational Injury/Illness

CA-10 and LS-201

DAF Traffic Safety Program

DAFVA 91-209

DAFSMS Responsibilities

- **Hazards and controls:** Address task hazards, environmental hazards, governing instructions, and hierarchy of controls including elimination, engineering, substitution, and administrative controls.
- **PPE:** Cover required protective equipment, wear/use procedures, cleaning, maintenance, storage, disposal, and supervisor notification concerns.
- **Emergency response:** Cover emergency action, fire prevention, alarms, AEDs, extinguishers, evacuation, shelter, active shooter response, and emergency contact procedures.
- **Reporting:** Explain unsafe condition reporting, injury/illness reporting, DAF Form 457, SAFEREP access, and anti-retaliation protections.
- **Program awareness:** Include CA-10 / LS-201 location, traffic safety program requirements, DAFVA 91-209 location, and DAFSMS responsibilities.

Hierarchy of Controls

Apply these controls from most effective to least effective when reducing workplace hazards under DAFI 91-202 paragraph 14.1.2.1.4.

HIERARCHY OF HAZARD CONTROLS

Use the highest level of control feasible first. PPE should protect workers only after elimination, substitution, engineering, and administrative controls have been considered.

Active Shooter Response

In the event of an active shooter, individuals should employ the **Avoid, Deny, Defend** response method. This strategy is adaptable to the specific situation and environment.

Responses to an Active Shooter include:

Avoid (RUN),

Deny (HIDE),

Defend (FIGHT)

Adapt your response to the weapons used:

Ricocheting bullets

Shrapnel and secondary missiles

Cover vs Concealment

An active shooter situation may be over within 15 minutes, before law enforcement arrives.

Avoid (Run): The first and preferred course of action is to evacuate the area if a safe route is available. Maintain awareness of your surroundings and have an escape route planned. Leave your belongings, evacuate regardless of whether others follow, and do not attempt to move wounded people. Once you have reached a safe location, call 911 and provide any information you have.

Deny (Hide): If you cannot evacuate, your next priority is to deny the attacker access to your location. This involves more than just hiding; it means securing your position. Lock and blockade doors with heavy furniture, turn off lights, silence your phone, and remain out of the shooter's view. Remember that concealment only hides you, while cover can offer protection from bullets.

Defend (Fight): As a last resort, when your life is in immediate danger, you must be prepared to defend yourself. Act aggressively and take action against the shooter. Improvise weapons from your surroundings and commit to your actions. Taking action may be risky, but it could be your best or only chance for survival.

When law enforcement arrives: Remain calm, follow all instructions, keep your hands visible with fingers spread, and be prepared to provide information about the shooter's location, number, and description.

DAFSMS FRAMEWORK

DAFSMS uses four pillars and the DAFSMS framework to structure the mishap prevention program through continuous improvement and the Plan-Do-Check-Act model.

Policy and Leadership

Provides the structure for a proactive mishap prevention program through policy, active leadership engagement, and clearly defined responsibilities at every level.

Risk Management

Integrates hazard identification, assessment, and control decisions into daily operations to reduce mishaps and strengthen safety culture.

Assurance

Uses evaluations, monitoring, reviews, and data to confirm the mishap prevention program is implemented and improving over time.

Promotion, Education, and Training

Ensures Airmen and Guardians receive safety awareness information, embedded training, effective risk controls, and active engagement in mishap prevention.

1. Purpose. DAFSMS utilizes the four pillars and the DAFSMS framework to structure the mishap prevention program. Activities associated with each pillar set policy, identify and mitigate hazards and risk, and reduce the occurrence and cost of injuries, illnesses, fatalities, and property damage through continuous improvement and the PDCA model.

2. Policy and Leadership. Safety policy provides the structure for a sound and proactive mishap prevention program. Active leadership involvement in implementation and execution is critical at all levels of command.

3. Risk Management. Ensure the RM process is fully integrated into all safety-related activities to enhance mishap prevention and sustain a proactive safety culture. Refer to DAFI 90-802 and DAFPAM 90-803 for additional detail.

4. Assurance. Safety assurance is how commanders determine whether mishap prevention elements are implemented and guides continuous improvement through evaluation, monitoring, and review.

5. Promotion, Education, and Training. Ensure Airmen and Guardians are provided safety awareness information, organizations have embedded ongoing training into the mishap prevention program, effective risk controls are implemented, and personnel remain actively engaged.

SAFEREP

Report it on SAFEREP

HAZARDS ARE EVERYWHERE.

WHAT ARE **YOU** DOING TO PREVENT INJURY OR DEATH?

More info about SAFEREP
www.safety.af.mil/home/saferep

SAFEREP is the Department of the Air Force's (DAF) premiere digital safety reporting tool and mobile app. It allows Airmen and Guardians to easily report hazardous conditions, near-misses, unintentional errors, or safety concerns across all disciplines, including workplace, traffic, industrial, flight, weapons, and space safety, directly from their devices anytime and anywhere.

Fully integrated with the Air Force Safety Automated System (AFSAS), it replaces the earlier Airman Safety App and serves as the DAF's only fully digital safety reporting avenue. Users simply answer a short series of questions to submit reports that reach the appropriate Major Command (MAJCOM) safety office quickly and efficiently.

Key Benefits for Job Safety Training:

- **Empowers everyone:** Turns every Airman or Guardian into a proactive sensor for hazard identification, encouraging a strong safety culture where people feel comfortable speaking up without barriers like paperwork or word-of-mouth delays.
- **Prevents mishaps:** Enables early mitigation of risks before they lead to incidents, capturing minor events and near-misses that offer the greatest prevention potential.
- **Simple and accessible:** Mobile-first design makes reporting fast, more efficient than traditional methods, and available on the spot through the app on Google Play and the Apple App Store.
- **Broad coverage and integration:** Supports multiple safety areas and includes specialized features such as Aviation Safety Action Program reporting, improving visibility, tracking, and overall risk management across the force.

This tool strengthens operational readiness by fostering a proactive, data-driven approach to safety. You can download it from the app stores or access it through the official SAFEREP site for more details.

SAFEREP portal: <https://saferep.safety.af.mil>

Learn more: <https://www.safety.af.mil/Home/SAFEREP/>

REPORTING UNSAFE EQUIPMENT, CONDITIONS, OR PROCEDURES

Employees must report unsafe equipment, conditions, or procedures to their supervisor immediately. This includes any hazard that could injure personnel, damage equipment, or create an unsafe work process.

Personnel must also be notified that unsafe conditions, work-related injuries, and illnesses may be reported **without fear of retaliation**. Immediate supervisor involvement remains the primary reporting path, with SAFEREP and formal hazard-report channels available when needed.

What To Report

- Unsafe equipment that is broken, damaged, unserviceable, or missing required guards or controls.
- Unsafe conditions or procedures that create a hazard to personnel, operations, or facilities.
- Work-related injuries, illnesses, near-misses, and hazards needing immediate attention.

Immediate Actions

- Notify the supervisor or responsible area lead immediately.
- If the hazard can be safely controlled, stop use and isolate the equipment or area until corrected.
- If the danger is imminent to life or health, evacuate the area and activate emergency response procedures.

Tag use examples: Use the appropriate danger, caution, out-of-order, or do-not-start tag to keep unsafe equipment out of service until the hazard has been corrected and the responsible supervisor authorizes return to use.

Escalation: If the issue cannot be resolved at the lowest level, elevate it through the unit safety representative, DAF Form 457 process, or SAFEREP as appropriate.

USE OF PORTABLE FIRE EXTINGUISHERS

Portable fire extinguishers are intended for small, incipient-stage fires only. Personnel should use an extinguisher only when they have been trained, the fire is small and contained, the correct extinguisher is available, and there is a clear evacuation path behind them.

Use the **PASS** method when operating a portable fire extinguisher: **Pull** the pin, **Aim** at the base of the fire, **Squeeze** the handle, and **Sweep** side to side.

If the fire grows, smoke conditions worsen, or the extinguisher does not control the fire immediately, evacuate the area, activate the local emergency response process, and report the incident to emergency services and supervision.

WORK AREA HAZARD ANALYSIS

Reference JHAs and AFSPECWAR Occupational Hazards memo in the Safety Program binder.

JHA:

[https://usaf.dps.mil/b:/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Program%20116%20ASOS_TMO.pdf?csf=1&web=1&e=UrR8Pw](https://usaf.dps.mil/b:/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Program%20116%20ASOS_TMO.pdf?csf=1&web=1&e=UrR8Pw)

AFSPECWAR Occupational Hazards Memo:

[https://usaf.dps.mil/b:/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Program%20116%20ASOS_TMO.pdf?csf=1&web=1&e=NtSLDS](https://usaf.dps.mil/b:/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Program%20116%20ASOS_TMO.pdf?csf=1&web=1&e=NtSLDS)

RISK MANAGEMENT FUNDAMENTALS

Reference: DAFSMS and local RM program guidance.

Address hazard identification, control selection, local escalation expectations, and when RM refresher training must be completed for this work center.

RM fundamentals are refreshed multiple times throughout the year and ORM is conducted prior to every major training event.

JOB SPECIFIC TRAINING ITEMS

Hazard Communication

Hearing Conservation

Explosives Safety Training

CPR Training

Fetal Protection Program

Electromagnetic Field Training

Laser Safety Training

Ladder Safety

Active Shooter Response

Government Vehicle / Utility Vehicle Use

Manual Lifting and Material Handling

Fire Protection and Prevention

Ergonomics / Office and Administrative Workstation Safety

Lead Awareness

Forklift / Material Handling Equipment

Thermal Stress / Heat and Cold Stress

- Hazard Communication:** Employees potentially exposed to chemical hazards must complete HAZCOM training upon initial assignment and whenever a new hazard or chemical is introduced or new tasks create new hazards. Supervisors must ensure SDS access for chemicals used in the work process. Provide effective training at initial assignment and whenever a new chemical hazard is introduced. Cover where hazardous chemicals are present, the written program, labels and SDS access, how releases are detected, hazard types, protective measures, emergency procedures, and required PPE. AFI 90-821 - Hazard Communication (HAZCOM) Program; 29 CFR 1910.1200 - Hazard Communication
Link to training:
[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=TyXi6T](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=TyXi6T)
- Hearing Conservation:** Hazardous noise concerns must be evaluated and controls recommended through the occupational health risk assessment process. Use the AF Hearing Conservation Program as the training and control basis when shop noise hazards are identified. Provide a hearing conservation training program for employees exposed at or above the action level, repeat it annually, and update it when equipment or work processes change. Cover hearing effects, protector selection and care, and the purpose of audiometric testing. AFI 48-127 - Occupational Noise and Hearing Conservation Program
Link to training:
[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prc127.pdf?csf=1&web=1&e=qkZ5Ns](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prc127.pdf?csf=1&web=1&e=qkZ5Ns)
- Explosives Safety Training:** Use explosives-specific AF lesson plans and local operating instructions. OSHA 2254 includes transportation and explosives references, but the Air Force explosives program should remain the primary training basis for this module. DESR 6055.09_DAFMAN 91-201 - Explosives Safety Standards; DAFI 91-202 - The Department of the Air Force (DAF) Mishap Prevention Program
Link to training:
[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=mXXLHE](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=mXXLHE)
- CPR Training:** Initial first aid and CPR training must be completed before assigning duties that require it, refresher training must occur before certification expires, and CPR training must include PAD instruction. Remote or high-risk work must have an immediate medical response plan. Where work conditions require trained first-aid responders, ensure personnel are adequately trained and available. OSHA 2254 links first-aid and CPR availability to certain work settings, but local mission risk and AF requirements should define who must hold current CPR credentials. DAFMAN 91-203 - Air Force Occupational Safety, Fire and Health Standards Chapter 1
Link to training:
[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=YttezK](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=YttezK)
- Fetal Protection Program:** Use AF occupational and public health guidance to brief reproductive hazards, reporting expectations, and referral procedures. No direct OSHA 2254 module is mapped here. DAFMAN 48-146 - Occupational Health Program Management; AFRCI 41-104 - Professional Board and National Certification Examinations as applicable
Link to training:
[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=YttezK](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=YttezK)
- Electromagnetic Field Training:** Employees with implanted medical devices must notify their supervisors before work and seek medical assessment before duties in EMF environments. Use AF EMF program controls and local work restrictions as the training basis. Use AF EMF program guidance for source identification, posted restrictions, exposure boundaries, and work controls. The closest OSHA 2254 crosswalk is electrical safety training for employees exposed to shock or electrical hazards and the electric power standard's job-assignment-specific safety practices and emergency procedures. AFI 48-109 - Electromagnetic Field Radiation (EMFR) Occupational and Environmental Health Program
Link to training:
[https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcd=w57cd39eb33494e75a7d652e7d19d088b&csf=1&web=1&e=purk2Z](https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcd=w57cd39eb33494e75a7d652e7d19d088b&csf=1&web=1&e=purk2Z)
- Laser Safety Training:** Use AF laser program guidance for laser classes, beam hazards, eyewear selection, alignment controls, and access restrictions. No direct OSHA 2254 module is mapped here. AFI 48-139 - Laser and Optical Radiation Protection Program
Link to training:
[https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prc%20Distro%20C.pptx?d=wf901f983203f44f4bd0048ca284a2ace&csf=1&web=1&e=9fr7f9](https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prc%20Distro%20C.pptx?d=wf901f983203f44f4bd0048ca284a2ace&csf=1&web=1&e=9fr7f9)
- Ladder Safety:** Personnel using ladders at any working height must be trained when first assigned, and that training must include hands-on instruction covering ladder defects, electrocution hazards, positioning, and placement for various job sites. Training must be documented under DAFI 91-202. Use local ladder lesson plans, manufacturer instructions, and AF walking-working surface guidance. OSHA 2254 (2015 edition) does not provide a dedicated general-industry ladder training summary in the same way it does for lockout, forklifts, or confined spaces, so this remains primarily AF/local-driven. Common local training item often broken out separately with fixed and portable ladder rules
Link to training:
[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=TFvWue](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=TFvWue)
- Active Shooter Response:** Tie this to the local emergency action plan, shelter/lockdown locations, notification methods, and commander-directed response procedures. Local emergency response briefing and lockdown procedures
Link to training:

[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=YttezK](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=YttezK)

- **Government Vehicle / Utility Vehicle Use:** Document local licensing, route restrictions, spotter use, rollover protection, and unit-specific operating rules. OSHA 2254 does not provide a direct GOV/UTV training excerpt here. Local GOV, GVO, or UTV operating rules and licensing expectations

Link to training:

[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=YttezK](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=YttezK)

- **Manual Lifting and Material Handling:** Supervisors must ensure thorough training on proper manual lifting techniques, required PPE, and the use of manual lifting devices. Training must use both verbal and written materials, include practice on proper motions, and be documented under DAFI 91-202. Cover shop-specific lifting limits, two-person lift triggers, hand truck and lifting-device use, and when supervisors require assisted handling. No direct OSHA 2254 standalone manual-lifting module is mapped here. Manual lifting techniques and available lifting devices

Link to training:

[https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcd=wc88359c6c0ce4816a7871343007b8c69&csf=1&web=1&e=4SAeiD](https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcd=wc88359c6c0ce4816a7871343007b8c69&csf=1&web=1&e=4SAeiD)

- **Fire Protection and Prevention:** Facility managers and supervisors must establish and maintain a fire prevention training program through the JSTO so employees understand their fire prevention and protection responsibilities in their work areas. This is fulfilled through job safety training and documentation under DAFI 91-202. Review the fire prevention plan with employees when the plan is developed, when responsibilities change, and when the plan changes. If extinguishers are provided for employee use, train employees on the general principles of extinguisher use and the hazards of incipient-stage firefighting at initial assignment and at least annually. Train designated users on the specific equipment they are expected to use. Local extinguisher, pull station, and fire reporting procedures

Link to training:

[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=RDGv2g](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=RDGv2g)

- **Ergonomics / Office and Administrative Workstation Safety:** Use DAFMAN 91-203 office safety and ergonomics guidance to brief administrative and computer-based workers on musculoskeletal disorder risk factors, workstation adjustment, posture, repetitive motion controls, manual handling of office materials, and supervisor follow-up for ergonomic concerns. Cover workstation setup, chair adjustment, monitor height and distance, keyboard and mouse position, neutral posture, repetitive motion, micro-pauses or task variation, safe lifting of office supplies, file cabinet and storage safety, early reporting of discomfort, and how to request a BE ergonomic assessment when needed. DAFMAN 91-203 - Air Force Occupational Safety, Fire and Health Standards; OSHA ergonomics guidance; local Bioenvironmental Engineering or Occupational Health guidance

Link to training:

[https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcd=wc88359c6c0ce4816a7871343007b8c69&csf=1&web=1&e=d6AGds](https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcd=wc88359c6c0ce4816a7871343007b8c69&csf=1&web=1&e=d6AGds)

- **Lead Awareness:** Document the local task or hazard, identify where the training is located, and explain how completion is documented. OSHA

Link to training:

[https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcsf=1&web=1&e=vQRQZY](https://usaf.dps.mil/b/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcsf=1&web=1&e=vQRQZY)

- **Forklift / Material Handling Equipment:** MHE training must follow equipment-specific lesson plans with formal instruction, hands-on demonstrations, exercises, and evaluation. Around aircraft, only licensed drivers will operate forklifts and hi-lift trucks, special training is required for hi-lift operators, and spotters must be used when maneuvering close to aircraft or raising and lowering cargo beds. Ensure each operator is trained and evaluated before operating independently. Training must combine formal instruction, practical training, and workplace evaluation, cover truck-specific and site-specific hazards, and include refresher training after unsafe operation, incidents, assignment to a different truck, or workplace changes. DAFMAN 91-203 - Air Force Occupational Safety, Fire and Health Standards Chapter 35; 29 CFR 1910.178 - Powered industrial trucks

Link to training:

[https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/\(2\)%20Additional%20Duties/\(28\)%20Safety%20Prcd=wc88359c6c0ce4816a7871343007b8c69&csf=1&web=1&e=4SAeiD](https://usaf.dps.mil/p/r/teams/116thAirSupportOperationsSquadron/Shared%20Documents/(2)%20Additional%20Duties/(28)%20Safety%20Prcd=wc88359c6c0ce4816a7871343007b8c69&csf=1&web=1&e=4SAeiD)

- **Thermal Stress / Heat and Cold Stress:** Use the occupational health risk assessment, local BE recommendations, and supervisor hazard controls to brief personnel on thermal stress hazards and controls for hot, cold, humid, outdoor, flight line, industrial, or PPE-intensive work areas. Cover heat stress, cold stress, WBGT or locally directed exposure monitoring, acclimatization, hydration, work/rest cycles, buddy checks, PPE or clothing considerations, symptom recognition, supervisor notification, and emergency response actions for suspected heat illness or cold injury. DAFMAN 91-203 - Air Force Occupational Safety, Fire and Health Standards; DAFI 48-145 - Occupational and Environmental Health Program; local Bioenvironmental Engineering or Occupational Health guidance

REQUIRED DOCUMENTS

- [CA-10](#)
What a Federal Employee Should Do When Injured at Work. Use this as the workplace reference for employee injury reporting and follow-up actions.
- [DAF Form 457](#)
Hazard Report. Use this form to identify, document, and elevate unsafe conditions, equipment, or procedures in the workplace.
- [DAFVA 91-209](#) **UNITS MUST FILL IN THEIR OWN DAFVA 91-209 POSTING/LOCATION INFORMATION.**
Department of the Air Force Occupational Safety and Health Program visual aid. Keep this available so personnel know the core safety rights, responsibilities, and reporting expectations.
- [LS-201](#)
Notice of Employee's Injury or Death (Non-Appropriated Funds). Use this when applicable for NAF employee injury or death reporting.

DAF TRAFFIC SAFETY PROGRAM

Reference: DAFI 91-207. Requirements of the DAF traffic safety program include mandatory use of seat belts and helmets, speed limits, local traffic hazards, spotters while backing, and vehicle training requirements. Additionally, brief prohibition or restrictions on electronic-device use while operating vehicles on- or off-base, and discuss motorcycle safety training requirements before riding a motorcycle.

On-Base / Vehicle Operations

- Obey posted speed limits, traffic control devices, and local roadway rules.
- Use installed seat belts and occupant restraints as designed by the manufacturer.

Electronic Devices / Headphones

- Do not use non-hands-free electronic devices while operating a motor vehicle.
- Stop in a safe location before using a phone if hands-free operation is not available.

- Use spotters while backing when required by local policy, task conditions, or vehicle type.
- Complete required GOV, GVO, golf cart, low-speed vehicle, or mission-specific vehicle training before operation.

- Do not wear headphones or listening devices in ways that interfere with hearing traffic, alarms, or emergency warnings.

Motorcycle / ATV Safety

- Complete required motorcycle rider training before riding on a roadway.
- Wear required PPE including helmet, eye protection, gloves, protective clothing, and over-the-ankle footwear.
- Carry proof of required training when applicable and comply with state licensing requirements.

Pedestrian / Bicycle Awareness

- Use caution at crossings, follow traffic controls, and wear visibility gear when exposed to roadway hazards.
- Use required lighting and reflective equipment during darkness, reduced visibility, or inclement weather.

Local Traffic Hazards / Vehicle Notes:

Enter local gate hazards, base-specific traffic concerns, spotter rules, and where vehicle training is documented.

Motorcycle Safety Representatives / Traffic Contacts:

Unit MSRs are CPT Chris Campbell (Pri) and SSG Timothy Auker (Alt).

No GVO risk assessment files uploaded.

EMERGENCY INFORMATION

Emergency Numbers:

Call 911 for emergencies and for base defense concerns call the Camp Murray JDOC at 253-512-2168.

Medical Facility / Treatment:

Personnel will perform SABC and call 911 as required for injuries. The nearest medical facility is Madigan Army Medical Center and their emergency room is open 24/7. The hospital is located across I-5 from Camp Murray.

Evacuation / Muster Point:

Muster point for emergencies is the gravel parking lot on the south side of Building 116.

Shelter in Place:

Not entered

Active Shooter Response Methods:

Not entered

Adverse Weather Shelter:

Not entered

No evacuation route image uploaded.

EMERGENCY EQUIPMENT AND SAFETY BOARD

Safety Bulletin Board Location: The safety bulletin board is located on the wall between the male and female bathrooms near the gym.

Fire extinguishers are located throughout the building and an AED is located in the gym.

No emergency equipment maps or photos uploaded.

DOCUMENTATION AND REVIEW

Training will be documented digitally on an Excel tracker located at

MEMORANDUM FOR 111 ASOC/LGMP

14 October 2017

FROM: 194th MDG/BEE

SUBJECT: 2017 Routine Occupational Health Assessment Report-111 ASOC Ground and Tri-Tac Radio Maintenance, Camp Murray (WPID: 0116-COTE-903A)

1. On 14 October 2017, MSgt Melissa Shields of the 194th MDG Bioenvironmental Engineering (BE) performed a routine occupational health assessment of the 111 ASOC Ground and Tri-Tac Radio Maintenance shop. In accordance with Air Force Instruction (AFI) 48-145, *Occupational and Environmental Health Program*, BE conducts routine assessments to identify potential health risks posed by work place activities, determine any additional monitoring required to characterize those risks, validate the adequacy of workplace controls, and to determine compliance with health related programs, standards, and laws. Based on the risks identified for your workplace, BE has identified your shop as a Category 2 workplace, and routine assessments will be conducted at least every 30 months. MSgt Greenwood, Shop Chief, provided technical information and assistance.
2. During this assessment, we verified the following activities which may present a potential occupational health hazard to workplace personnel: *Monthly Truck Run-ups, Preventative Maintenance inspections, Setting up RF Equipment, Preparing and Mobility Boxes*. Occupational Health personal protective equipment (OH-PPE) for each activity is identified in Attachment 1, *Personal Protective Equipment (PPE) Certification*, provided IAW AFOSH Std 91-501. This list identifies only the required and recommended equipment for protection from occupational health hazards, and does not include safety related PPE.
 - a. BE has identified no changes regarding occupational activities performed in your workplace since our last survey. Please refer to the previous reports for occupational health assessments of the workplace activities.
 - b. Hazardous Noise: Personnel are routinely exposed to hazardous noise when working with electric/pneumatic tools and while operating and maintaining power generators. There are no changes regarding noise exposures since the last survey. All hearing protection devices used provide adequate protection. See attachment 1 for detailed hearing protection requirements

- c. Hazardous Materials: MSgt Greenwood reported the shop no longer uses lubricants, cleaners and adhesives to perform preventative maintenance on equipment. Stencil paints are still in use.
 - d. Hazardous Communication Program: BE reviewed the shop's hazardous material (HAZMAT) usage and *Hazard Communication* (HAZCOM) Program for compliance with AFOSH requirements. The shop maintains copies of AFI 90-821, Hazardous Communication, Work place *Written Hazard Communication Program*, and has a current chemical inventory. Material Safety Sheets (MSDS) and Safety Data Sheets (SDS) are readily available for shop personnel to review. There were discrepancies noted with the shop's training records which needs to be updated.
3. IAW AFI 91-301, *Air Force Occupational and Environmental Safety, Fire Prevention, and Health (AFOSH) Program*, para 2.14, the shop supervisor must post a copy of this assessment report on the workplace bulletin board for a period of 10 days after receipt to allow all workers free access to the findings and recommendations. The supervisor must maintain BE reports on file in the work place for a period of 10 years.
 4. If you have any questions regarding this report, please contact the 194th MDG (BE) at DSN 370-3258 or email at melissa.shields.mil@mail.mil.

MELISSA SHIELDS, MSgt, WANG
Bioenvironmental Engineering Technician
