

Job Safety Training Outline

Built to align with DAFI 91-202 paragraph 14.1 requirements.

Unit: 20 ASOS

Work Center: Ft Drum, NY

Work Area / Office Symbol: 11480 Enduring Freedom Drive, Ft Drum NY 13602

Phone: 315-772-3687

Supervisor: Anthone McCormick / Capt / USR

Reviewer: Peter Kosierowski / Capt / USR

Review Date: 2026-07-29

Effective Date: 2026-07-29

Work Center Overview

The 20 ASOS delivers multi-domain, Precision Strike, and C2 capability for combat commanders across the joint force.

Work Area Hazard Analysis / JHA Notes

IAW Air Force Instructions a JHA is not required when official guidance exists, covering all steps/tasks. A JHA is needed

if procedures are modified, changed, incomplete or operational conditions change until the guidance is updated.

One of the best ways to determine and establish proper work procedures, ensuring that employees are properly trained is

through a job hazard analysis.

If you have any questions or would like to have a JHA conducted, reach out to your unit USRs.

Required Training Topics

Workplace Hazards
Personal Protective Equipment
Emergency Action and Fire Prevention
Reporting Unsafe Equipment, Conditions, or Procedures
Mishap, Occupational Injury, and Illness Reporting
CA-10 and LS-201
DAF Traffic Safety Program
DAFVA 91-209 Location and Content
DAFSMS Responsibilities

- **Workplace hazards:** Describe crushing, burn, chemical, ladder, weather, flight line, and noise hazards specific to the work center, plus the technical orders, JHAs, and instructions workers must follow.
- **Personal protective equipment:** Train employees on required PPE, including donning, doffing, cleaning, maintenance, storage, disposal, and reporting contact-lens or medical issues that could affect wear.
- **Emergency action and fire prevention:** Cover alarms, AEDs, extinguishers, evacuation routes, shelter locations, and response procedures tied to the work center.
- **Reporting unsafe conditions:** Instruct personnel to report unsafe equipment, conditions, procedures, and injuries without fear of reprisal, including use of DAF Form 457 and applicable reporting channels.
- **Mishap / injury / illness reporting:** Explain on-duty and off-duty reporting requirements, medical treatment procedures, and emergency response contacts.
- **Traffic safety:** Brief seat belt, speed limit, spotter, electronic device, and motorcycle safety requirements applicable to the work center.
- **DAFVA 91-209 and DAFSMS:** Review the location of DAFVA 91-209 and how workers contribute to the unit safety management system.

Hierarchy of Controls

Apply these controls from most effective to least effective when reducing workplace hazards under DAFI 91-202 paragraph 14.1.2.1.4.

HIERARCHY OF **HAZARD CONTROLS**

Use the highest level of control feasible first. PPE should protect workers only after elimination, substitution, engineering, and administrative controls have been considered.

Active Shooter Response

In the event of an active shooter, individuals should employ the **Avoid, Deny, Defend** response method. This strategy is adaptable to the specific situation and environment.

Responses to an Active Shooter include:

Avoid (RUN),

Deny (HIDE),

Defend (FIGHT)

Adapt your response to the weapons used:

Ricocheting bullets

Shrapnel and secondary missiles

Cover vs Concealment

An active shooter situation may be over within 15 minutes, before law enforcement arrives.

Avoid (Run): The first and preferred course of action is to evacuate the area if a safe route is available. Maintain awareness of your surroundings and have an escape route planned. Leave your belongings, evacuate regardless of whether others follow, and do not attempt to move wounded people. Once you have reached a safe location, call 911 and provide any information you have.

Deny (Hide): If you cannot evacuate, your next priority is to deny the attacker access to your location. This involves more than just hiding; it means securing your position. Lock and blockade doors with heavy furniture, turn off lights, silence your phone, and remain out of the shooter's view. Remember that concealment only hides you, while cover can offer protection from bullets.

Defend (Fight): As a last resort, when your life is in immediate danger, you must be prepared to defend yourself. Act aggressively, improvise weapons from your surroundings, and commit fully to your actions. Taking action may be risky, but it could be your best or only chance for survival.

When law enforcement arrives: Remain calm, follow all instructions, keep your hands visible with fingers spread, and be prepared to provide information about the shooter's location, number, and description.

DAFSMS uses four pillars and the DAFSMS framework to structure the mishap prevention program through continuous improvement and the Plan-Do-Check-Act model.

Policy and Leadership

Safety policy provides the structure for a proactive mishap prevention program. Active leadership involvement at every level is critical to implementation and sustained execution.

Risk Management

Integrate risk management into all safety-related activities so hazards are identified early, controls are implemented, and the safety culture stays proactive.

Assurance

Use evaluations, monitoring, and review processes to measure conformance to standards and drive continuous improvement across the mishap prevention program.

Promotion, Education, and Training

Provide safety awareness, embed ongoing training, implement effective controls, and keep airmen and guardians actively engaged in mishap prevention.

Department of the Air Force SMS Framework

Policy and Leadership

- Leadership planning, organization, direction, and control
- Management roles, responsibilities, and relationships
- Procedures and controls that are developed, documented, maintained, and monitored
- Safety and quality balance, integration, and goal setting

Risk Management

- Hazard identification through mission/task analysis and hazard lists
- Hazard assessment using exposure, probability, severity, and risk level
- Control options, effects, prioritization, selection, and decisions
- Implementation, communication, accountability, support, supervision, and feedback

Assurance

- Performance requirements, expectations, and control effectiveness
- Continuous monitoring, self-inspections, internal and external inspections
- Mishap and event investigation, reporting, metrics, and improvement opportunities
- Change management and continuous improvement actions

Promotion, Education, and Training

- Culture built on informed, flexible, learning, just, and reporting behaviors
- Competency through training and education
- Awareness through internal communication, external communication, and information access

Job Specific Training Items

The following modules apply to this work center and should be reviewed with trainees before task performance.

Hearing Conservation Explosives Safety Training CPR Training Fetal Protection Program Electromagnetic Field Training Laser Safety Training Ladder Safety Active Shooter Response Government Vehicle / Utility Vehicle Use Manual Lifting and Material Handling Personal Protective Equipment (PPE)

- **Hearing Conservation:** Ensure workers enrolled in hearing conservation understand noise hazard areas, double-hearing protection requirements, and local follow-up actions tied to occupational health evaluations. Train noise-exposed employees annually on the effects of noise, the purpose of hearing protectors, the advantages and disadvantages of various protectors, and the purpose of audiometric testing. DAFI 48-127; 29 CFR 1910.95 - Occupational noise exposure
- **Explosives Safety Training:** Provide initial and task-specific explosives safety training using approved lesson plans, local instructions, and quantity-distance / compatibility controls before personnel work with explosives. Use explosives-specific AF lesson plans and local operating instructions. OSHA 2254 includes transportation and explosives references, but the Air Force explosives program should remain the primary training basis for this module. DESR 6055.09_DAFMAN 91-201 - Explosives Safety Standards; DAFI 91-202 - The Department of the Air Force (DAF) Mishap Prevention Program
- **CPR Training:** Ensure designated responders maintain current certification and understand location and use of local AED assets under the unit mishap prevention program. Provide CPR and AED training before assignment where required, and refresh qualification before expiration. DAFMAN 91-203 - Air Force Occupational Safety, Fire and Health Standards, Chapter 1

- **Fetal Protection Program:** Use occupational and environmental health guidance to discuss declaration options, exposure review, and local work restriction procedures. Provide job-specific hazard awareness for reproductive health risks where occupational exposures may affect pregnant workers or fetuses. DAFMAN 48-146
- **Electromagnetic Field Training:** Use approved EMF hazard assessments and local instructions to brief workers on hazard zones, signs, and restrictions before exposure. Provide task-specific training on electromagnetic field hazards, posting requirements, access controls, and reporting expectations where EMF sources are present. DAFI 48-109
- **Laser Safety Training:** Use local laser safety officer guidance and approved operating instructions to cover exposure limits, alignment procedures, and emergency actions. Provide laser hazard awareness, eyewear, posting, alignment, and beam-control training before personnel work with lasers or enter laser-controlled areas. DAFI 48-139
- **Ladder Safety:** Provide hands-on ladder safety training at first assignment, including local storage, damaged-tag procedures, and fall prevention expectations. Train workers to inspect ladders before use, maintain three points of contact, set ladders on stable surfaces, and avoid overreaching or using damaged ladders. DAFMAN 91-203 - Air Force Occupational Safety, Fire and Health Standards, Chapter 7
- **Active Shooter Response:** Use local emergency response procedures, shelter locations, and mass notification methods applicable to the duty location. Brief personnel on how to recognize an active shooter event, how to summon help, and how to apply local run-hide-fight guidance based on the facility layout. Installation emergency management guidance / local procedures
- **Government Vehicle / Utility Vehicle Use:** Brief operators on unit-specific government vehicle training requirements, local route restrictions, low-speed vehicle rules, and documentation of qualification. Train vehicle operators on seat belts, speed limits, local traffic hazards, spotter use while backing, and restrictions on electronic device use while driving. DAFI 91-207; local procedures
- **Manual Lifting and Material Handling:** Provide verbal and written guidance on manual lifting, lifting devices, and local reporting actions for strain or overexertion symptoms. Train workers on proper lifting techniques, team lifting, load assessment, and use of lifting aids to reduce musculoskeletal injury risk. DAFMAN 91-203 - Air Force Occupational Safety, Fire and Health Standards, Chapter 20
- **Personal Protective Equipment (PPE):** Use the work-center JHA, BE occupational health assessment, manufacturer instructions, DAFMAN 91-203 Chapter 14, and local safety office guidance to identify PPE requirements. Supervisors must ensure PPE is provided, used, cleaned, inspected, maintained in sanitary and serviceable condition, and documented in JSTO training records. Cover eye and face protection, head protection, foot protection, hand protection, protective clothing, and respiratory or hearing protection when those programs apply. Train each affected worker on when PPE is necessary, what PPE is necessary, how to properly don, doff, adjust, and wear PPE, the limitations of assigned PPE, and the proper care, maintenance, useful life, and disposal of PPE. Require workers to demonstrate understanding and proper use before performing work requiring PPE, and retrain when workplace conditions, job assignments, PPE types, or worker knowledge gaps make prior training obsolete. DAFMAN 91-203 - Air Force Occupational Safety, Fire and Health Standards, Chapter 14; 29 CFR Part 1910 - Occupational Safety and Health Standards (General Industry Standards) Subpart I; 29 CFR 1910.132; 29 CFR 1910.133; 29 CFR 1910.135; 29 CFR 1910.136; 29 CFR 1910.138

Ergonomics Workstation Posture Guide:

Use this guide while briefing office and administrative workstation setup.

Traffic Safety Program

DAF Traffic Safety Program (DAFI 91-207): Train personnel on mandatory use of seat belts and helmets, speed limits, local traffic hazards, spotters while backing, vehicle training requirements, and restrictions on electronic device use while operating vehicles on- or off-base.

Seat Belts / Occupant Restraints: All persons operating or riding in motor vehicles must wear installed restraint systems as prescribed by the manufacturer. Drivers are responsible for ensuring all passengers are briefed on and use required restraints.

Motorcycle / ATV Training: Personnel must complete required safety training before riding a motorcycle, and local units should address required PPE, licensing, refresher training, and safety representative contacts.

Pedestrian / Bicycle Awareness: Emphasize local roadway crossing hazards, visibility requirements, spotter use, and other pedestrian or bicycle precautions specific to the installation.

Local Traffic Hazards / Vehicle Notes:

For vehicle specific items, see Vehicle Maintenance in the SWMS hallway.

Motorcycle Safety Representatives / Traffic Contacts:

Primary: TSgt Dominic Archuleta: 315-772-3419 // Dominic.archuleta@us.af.mil

Alternate: SSgt Blake Hammock: 315-772-4418 // Blake.hammock@us.af.mil

No routine-use GVO risk assessment files uploaded.

Reporting Unsafe Equipment, Conditions, or Procedures

Notify the supervisor immediately when unsafe equipment, conditions, or procedures are identified. Personnel may report hazards without fear of retaliation, coercion, discrimination, or reprisal.

- **DAF Form 457:** Use to document and elevate unsafe conditions, equipment, or processes.
- **SAFEREP:** Use the approved mishap or hazard reporting channel for additional reporting when directed by local procedures.

SUPERVISOR MISHAP REPORT											
Authority: Executive Order 12196, 29 CFR 1960, 10 USC 9013, DoDI 6055.07 and DAFI 91-204. Privacy Act: This form requires collecting and maintaining information protected by the Privacy Act of 1974. Form will be safeguarded from unauthorized disclosure. Purpose: To assist safety professionals in identification of individuals and to obtain required personal information to complete mishap reports. Routine Use: Used to (a) Establish the severity of injury/illness and to ensure proper reporting accountability within the Department of the Air Force; (b) Identify causes of illness/injuries so supervisors and functional managers can take appropriate action to eliminate or control unsafe and unhealthy conditions; (c) Prepare statistical and historical reports as required by Executive Order 12196 and Department of Defense; (d) Provide documentation for cumulative summation of treatment causes. Disclosure: Voluntary, however failure to provide requested information may delay appropriate corrective action to ensure personal safety and reporting mishaps to AFSEC.											
SECTION I: EVENT INFORMATION (Required)											
1. Date of Mishap	2. Time of Mishap	3. On/Off Installation	4. Specific mishap location								
5. What was the employee doing just before the mishap occurred? Describe the activity, as well as the tools, equipment, or material the employee was using. Be specific. <i>Examples: Climbing a ladder while carrying roofing materials., Spraying chlorine from hand sprayer., Daily computer key-entry.</i>											
6. What happened? Tell us how the injury occurred. <i>Examples: When ladder slipped on wet floor, worker fell 20 feet., Worker was sprayed with chlorine when gasket broke during replacement., Worker developed soreness in wrist over time.</i>											
7. What object or substance directly harmed the employee? <i>Examples: concrete floor, chlorine, radial arm saw. If this question does not apply to the incident, leave it blank.</i>											
8. Witnesses ☐ YES ☐ NO (Witness Information, name, address, contact number, email etc.)											
SECTION II: EMPLOYEE INFORMATION (as applicable)											
9. Name (Last, First MI)			10. Grade/Rank		11. Job title		12. Age		13. Sex		14. DoD ID #
15. Address (Street, City, State & Zip) Type: ☐ Home ☐ Work						16. Phone					
17. Organization		18. DoD Employee Type			19. On/Off duty		20. Duty status		21. Unit		
22. Office symbol		23. Deployed Unit		24. Deployed Office		25. DAFSC/Occ series		26. Date hired (Civilian)			
27. Time shift started		28. # Days since last deployment/TDY		29. # Days Deployed/TDY in last 365		30. Operating object?		31. MUSTT Account?			
SECTION III: MEDICAL & INJURY INFORMATION (as applicable)											
32. Treatment (Select all that apply) ☐ No Medical Treatment Needed ☐ Refused Medical Treatment ☐ First/Self Aid Only ☐ Medical Treatment Greater than First Aid ☐ Prescription Medication ☐ Treated at Medical Facility ☐ Inpatient Hospitalization # of days ☐ Job Transfer # of days ☐ Days Away from Work # of days ☐ Returned to Restricted Duties # of days											
33. What was the injury or illness? Tell us the part of the body that was injured and how it was affected. <i>Examples: strained back, chemical burn, left hand, carpal tunnel syndrome. (Be sure to include side i.e., left shoulder, right index finger, etc.)</i>											
34. If treatment was provided away from worksite, where was it administered? (Facility, Street, City, State & Zip)											
35. Name of physician or health care professional										36. TOX test?	
SECTION IV: OBJECT, PROPERTY, MOTOR VEHICLE & DAMAGE INFORMATION (as applicable)											
37. Object, property or vehicle description (Include manufacturer, model, designator, part number, serial number, vehicle year, etc. as applicable)											

The information herein contains **CONTROLLED UNCLASSIFIED INFORMATION (CUI)** which must be protected under the Freedom of Information Act (5 U.S.C. 552) and/or the Privacy Act of 1974 (5 U.S.C. 552a). Unauthorized disclosure or misuse of this **PERSONAL INFORMATION** may result in disciplinary action, criminal and/or civil penalties.
