Job Safety Training Outline

Built to align with DAFI 91-202 paragraph 14.1 requirements.

Unit: 710 COS

Work Center: Ryan Center

Work Area / Office Symbol: A33 / COD

Phone: 757-764-0265

Supervisor: James Tillett / Major / A33 Chief

Reviewer: Maj James Tillett

Review Date: 2026-10-14

Effective Date: 2026-10-14

Work Center Overview

Located on the third floor of the Ryan Center, this work center is dedicated to delivering vital operational augmentation to active duty Air Operations Centers worldwide, ensuring air component commanders in any theater receive critical expertise, tactical integration, and sustained operational continuity. Operating within a standard professional office environment, personnel routinely carry out typical administrative, planning, and coordination duties, including drafting operational correspondence, managing communications, conducting reachback support, and maintaining operational readiness records.

Work Area Hazard Analysis / JHA Notes

Summarize JHA findings, BE survey notes, major hazards, controls, and special restrictions for this work center.

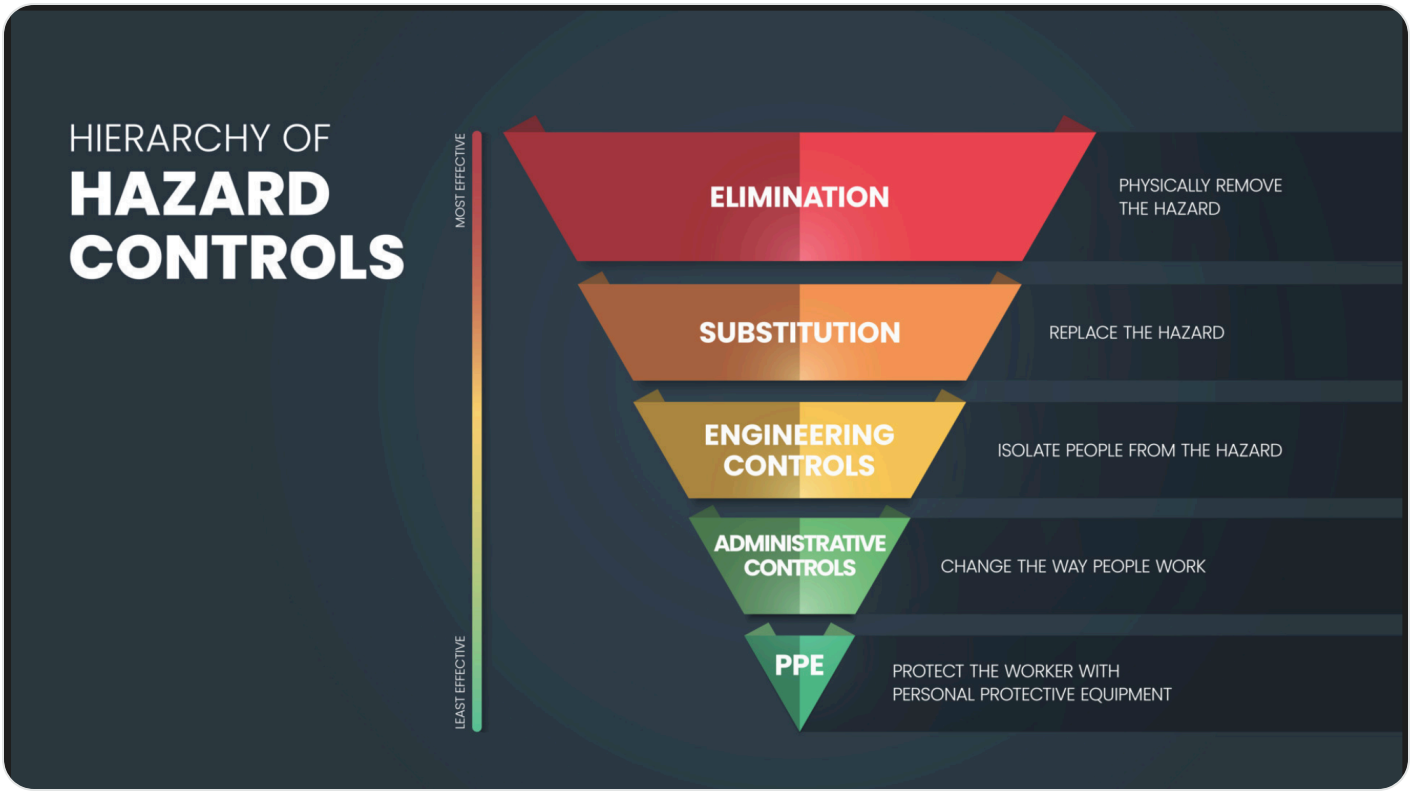

Required Training Topics

Workplace HazardsPersonal Protective EquipmentEmergency Action and Fire PreventionReporting Unsafe Equipment, Conditions, or ProceduresMishap, Occupational Injury, and Illness ReportingCA-10 and LS-201DAF Traffic Safety ProgramDAFVA 91-209 Location and ContentDAFSMS Responsibilities

- **Workplace hazards:** Describe crushing, burn, chemical, ladder, weather, flight line, and noise hazards specific to the work center, plus the technical orders, JHAs, and instructions workers must follow.
- **Personal protective equipment:** Train employees on required PPE, including donning, doffing, cleaning, maintenance, storage, disposal, and reporting contact-lens or medical issues that could affect wear.
- **Emergency action and fire prevention:** Cover alarms, AEDs, extinguishers, evacuation routes, shelter locations, and response procedures tied to the work center.
- **Reporting unsafe conditions:** Instruct personnel to report unsafe equipment, conditions, procedures, and injuries without fear of reprisal, including use of DAF Form 457 and applicable reporting channels.
- **Mishap / injury / illness reporting:** Explain on-duty and off-duty reporting requirements, medical treatment procedures, and emergency response contacts.
- **Traffic safety:** Brief seat belt, speed limit, spotter, electronic device, and motorcycle safety requirements applicable to the work center.
- **DAFVA 91-209 and DAFSMS:** Review the location of DAFVA 91-209 and how workers contribute to the unit safety management system.

Hierarchy of Controls

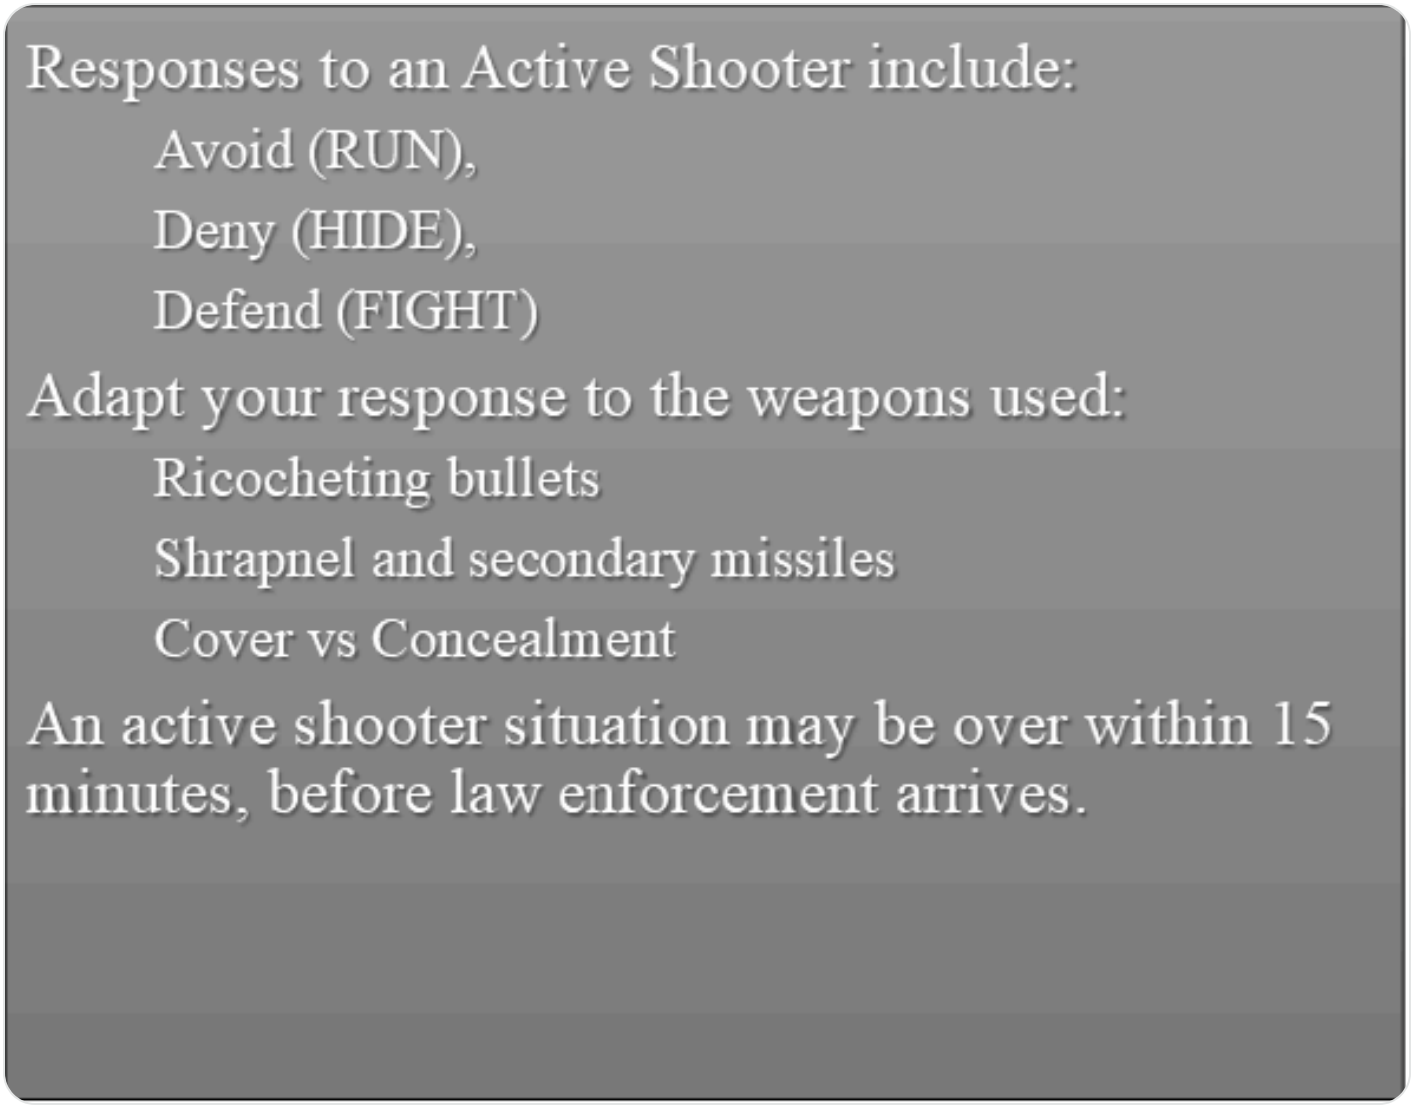

Apply these controls from most effective to least effective when reducing workplace hazards under DAFI 91-202 paragraph 14.1.2.1.4.

Use the highest level of control feasible first. PPE should protect workers only after elimination, substitution, engineering, and administrative controls have been considered.

Active Shooter Response

In the event of an active shooter, individuals should employ the **Avoid, Deny, Defend** response method. This strategy is adaptable to the specific situation and environment.

Avoid (Run): The first and preferred course of action is to evacuate the area if a safe route is available. Maintain awareness of your surroundings and have an escape route planned. Leave your belongings, evacuate regardless of whether others follow, and do not attempt to move wounded people. Once you have reached a safe location, call 911 and provide any information you have.

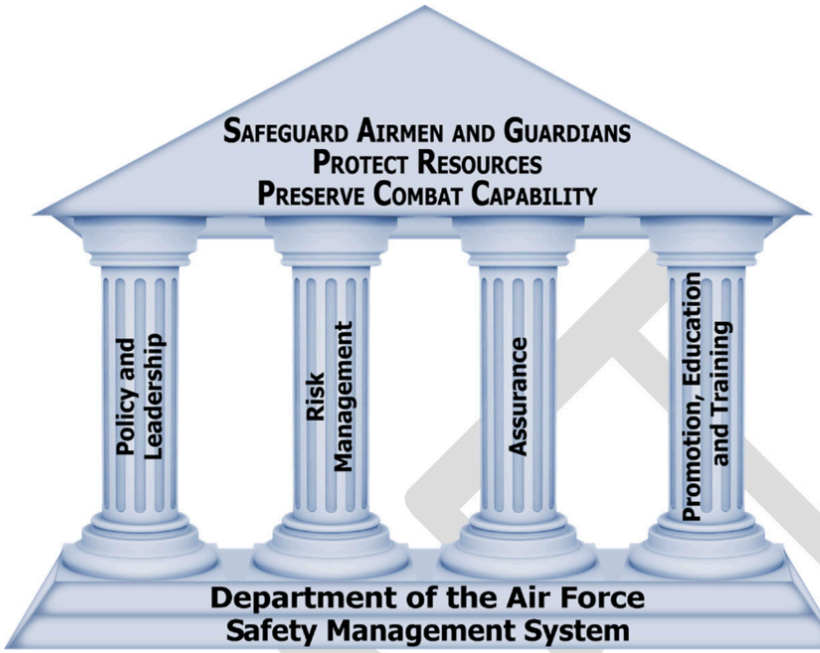

Deny (Hide): If you cannot evacuate, your next priority is to deny the attacker access to your location. This involves more than just hiding; it means securing your position. Lock and blockade doors with heavy furniture, turn off lights, silence your phone, and remain out of the shooter's view. Remember that concealment only hides you, while cover can offer protection from bullets.

Defend (Fight): As a last resort, when your life is in immediate danger, you must be prepared to defend yourself. Act aggressively, improvise weapons from your surroundings, and commit fully to your actions. Taking action may be risky, but it could be your best or only chance for survival.

When law enforcement arrives: Remain calm, follow all instructions, keep your hands visible with fingers spread, and be prepared to provide information about the shooter’s location, number, and description.

DAFSMS Framework

DAFSMS uses four pillars and the DAFSMS framework to structure the mishap prevention program through continuous improvement and the Plan-Do-Check-Act model.

Policy and Leadership

Safety policy provides the structure for a proactive mishap prevention program. Active leadership involvement at every level is critical to implementation and sustained execution.

Risk Management

Integrate risk management into all safety-related activities so hazards are identified early, controls are implemented, and the safety culture stays proactive.

Assurance

Use evaluations, monitoring, and review processes to measure conformance to standards and drive continuous improvement across the mishap prevention program.

Promotion, Education, and Training

Provide safety awareness, embed ongoing training, implement effective controls, and keep airmen and guardians actively engaged in mishap prevention.

Department of the Air Force SMS Framework

Policy and Leadership

- Leadership planning, organization, direction, and control

- Management roles, responsibilities, and relationships
- Procedures and controls that are developed, documented, maintained, and monitored
- Safety and quality balance, integration, and goal setting

Risk Management

- Hazard identification through mission/task analysis and hazard lists
- Hazard assessment using exposure, probability, severity, and risk level
- Control options, effects, prioritization, selection, and decisions
- Implementation, communication, accountability, support, supervision, and feedback

Assurance

- Performance requirements, expectations, and control effectiveness
- Continuous monitoring, self-inspections, internal and external inspections
- Mishap and event investigation, reporting, metrics, and improvement opportunities
- Change management and continuous improvement actions

Promotion, Education, and Training

- Culture built on informed, flexible, learning, just, and reporting behaviors
- Competency through training and education
- Awareness through internal communication, external communication, and information access

Job Specific Training Items

No job-specific modules selected yet.

No modules selected

Required Documents

- CA-10
  What a Federal Employee Should Do When Injured at Work. Use this as the workplace reference for employee injury reporting and follow-up actions.
- DAF Form 457
  Hazard Report. Use this form to identify, document, and elevate unsafe conditions, equipment, or procedures in the workplace.
- DAFVA 91-209 **UNITS MUST FILL OUT THEIR OWN LOCATION POSTED**
  Department of the Air Force Occupational Safety and Health Program visual aid. Keep this

available so personnel know the core safety rights, responsibilities, and reporting expectations.
Location Posted: Enter where DAFVA 91-209 is posted for this work center.

- LS-201
  Notice of Employee's Injury or Death (Non-Appropriated Funds). Use this when applicable for NAF employee injury or death reporting.

Emergency Information

- **Emergency Numbers:** 911, Ryan Center Security: 225-8594, Command Post: 574-5411, Security Forces: 764-5091, BDOC: 902-2819, Wing Safety: 501-8224/764-5057
- **Medical Facility / Treatment:** During normal duty hours on weekdays, personnel are to report to Langley AFB Hospital for assessment and treatment of injuries suffered while on-the-job. Civilian employees may elect to receive treatment from their personal physician.

  If the injury or medical condition does not permit the injured person to first report to Langley AFB Hospital the individuals should be treated at the closest medical facility.

  The Base Clinic is located at 77 Nealy Avenue. Also, advise member that the Base Clinic does provides 24 hour emergency service. Call (757) 225-7630, or DSN 575-7630.
- **Evacuation / Muster Point:** Primary route is the North Stairwell. Secondary route is the South Stairwell. Assembly location for the 710 COS is the Southeast corner of the Ryan Center parking lot.
- **Shelter in Place:** There are six SIP locations located within the Ryan Center. All personnel on the 1st floor collateral area report to conference room A121. All personnel on the 1st floor SCIF areas report to D105. All personnel on the 2d floor collateral areas report to conference rooms B201 and/or D209. All 3rd floor personnel report to conference room F303 and/or the Ops floor across the hall.
- **Active Shooter Response Methods:** An active shooter is an individual actively engaged in killing or attempting to kill people. In most cases, active shooters use firearms and there is no pattern or method to their selection of victims. In some cases, active shooters use improvised explosive devices to create additional victims and to impede first responders.

  All personnel should know the following term:
  LOCKDOWN – An announcement used on Air Force installations as a security measure to confine and restrict movement. All individuals, including military uniformed services, federal employees, contractors, dependents, and other people on an installation as a guest are required to restrict their movement when lockdown is declared. During lockdown, no person may enter or exit another area until the all clear is broadcasted; unless movement is required to escape from a dangerous place or situation.

  When a LOCKDOWN/ACTIVE SHOOTER is announced:
  The Senior Person on Duty (SPOD) for each facility will ensure a person immediately proceeds to the building entrance to implement the following measures:
  a. If it is safe to do so, retrieve "Lockdown in Progress" sign (kept behind the hard-copy EAP next to the security binder) and post over badging keypad or on door.
  b. Lock the CDX-9/10. Referring to the image below, pull out the Life Safety pin and turn the Pedestrian Door Lock knob clockwise until it stops to secure the door and to impede/delay a possible cleared active shooter from badging/entering into the facility.
  Evacuate – If an escape route is accessible, evacuate the immediate area! Leave your belongings behind and help others evacuate, if possible, but evacuate even if others will not agree to follow you. Call 911 or 764-5091/5092 when you are safe. Once evacuated, prevent others from entering the area. Follow any law enforcement instructions and, if in view of approaching law enforcement personnel, keep your hands visible. Do not attempt to move wounded individuals.

Barricade – If evacuation is not possible, find a place to create a barricade between you and the active shooter. Your barricade location should be where you are less likely to be found by the active shooter, provide you protection, and not restrict your options for movement. If possible, lock the door and or block the door with heavy furniture. Turn off any lights and cover first floor windows. Remain quiet and silence any devices that may give away your hiding place. If safe to do so, call 911 or 764-5091/5092 to alert law enforcement of your location and stay on the phone.

Fight – As a last resort, and only when your life is in imminent danger, attempt to disrupt and/or incapacitate the shooter. Personnel should use whatever means possible to overpower the subject to save further lives. Use the minimum force necessary to subdue the shooter; however, deadly force is authorized when an individual reasonably believes they or others in the area are in immediate danger of death or serious bodily harm.

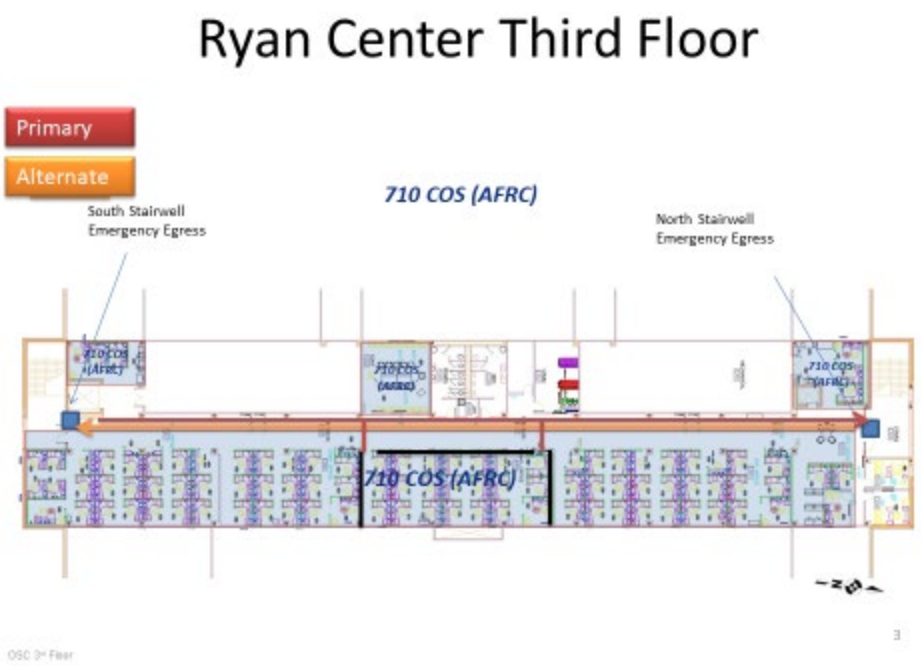

Information to provide to law enforcement/security forces when you are able/safe to do so:
Number of active shooters, if more than one
Location of the shooter (s)
Physical description of the shooter (s)
Time you observed the shooter (s)
Number and type of weapons held by the shooter (s)
Number of potential victims at the location

When law enforcement/security forces arrive, their primary purpose is to stop the shooter as soon as possible. Responders will proceed directly to the area in which the last shots were heard/reported and will not stop to help injured persons until the shooter is confirmed to be neutralized. Your responsibilities are to:
Remain calm and follow instructions
Place any items in your hands on the ground and raise immediately raise your hands and spread your fingers. Keep hands visible at all times!
Do not impede law enforcement officers' movements, such as holding on to them for safety or asking them for help or directions when evacuating
Provide any information that may assist them in countering the threat
Avoid pointing, screaming and/or yelling
Move quickly to the assembly point and stay there until the situation is under control; do not leave until instructed to do so by law enforcement.

After the active shooter situation is neutralized; stay away from the incident area. Listen to local radio, television stations, and/or the installation's warning and notification system for the latest information. Notify your friends and family of your condition; however, use phone services sparingly so they remain open for emergency responders. Finally, know and recognize the signs of incident related stress and seek assistance as needed.

- **Adverse Weather Shelter:** Not entered

Emergency Equipment and Safety Board

Safety Bulletin Board Location: Found at the E307 Corridor by the water fountain and Men's Restroom.

List fire pull stations, extinguishers, power cutoffs, eyewash stations, AEDs, foam systems, and any local fire/emergency equipment notes.

No emergency equipment maps or location photos uploaded.

Traffic Safety Program

DAF Traffic Safety Program (DAFI 91-207): Train personnel on mandatory use of seat belts and helmets, speed limits, local traffic hazards, spotters while backing, vehicle training requirements, and restrictions on electronic device use while operating vehicles on- or off-base.

Seat Belts / Occupant Restraints: All persons operating or riding in motor vehicles must wear installed restraint systems as prescribed by the manufacturer. Drivers are responsible for ensuring all passengers are briefed on and use required restraints.

Motorcycle / ATV Training: Personnel must complete required safety training before riding a motorcycle, and local units should address required PPE, licensing, refresher training, and safety representative contacts.

Pedestrian / Bicycle Awareness: Emphasize local roadway crossing hazards, visibility requirements, spotter use, and other pedestrian or bicycle precautions specific to the installation.

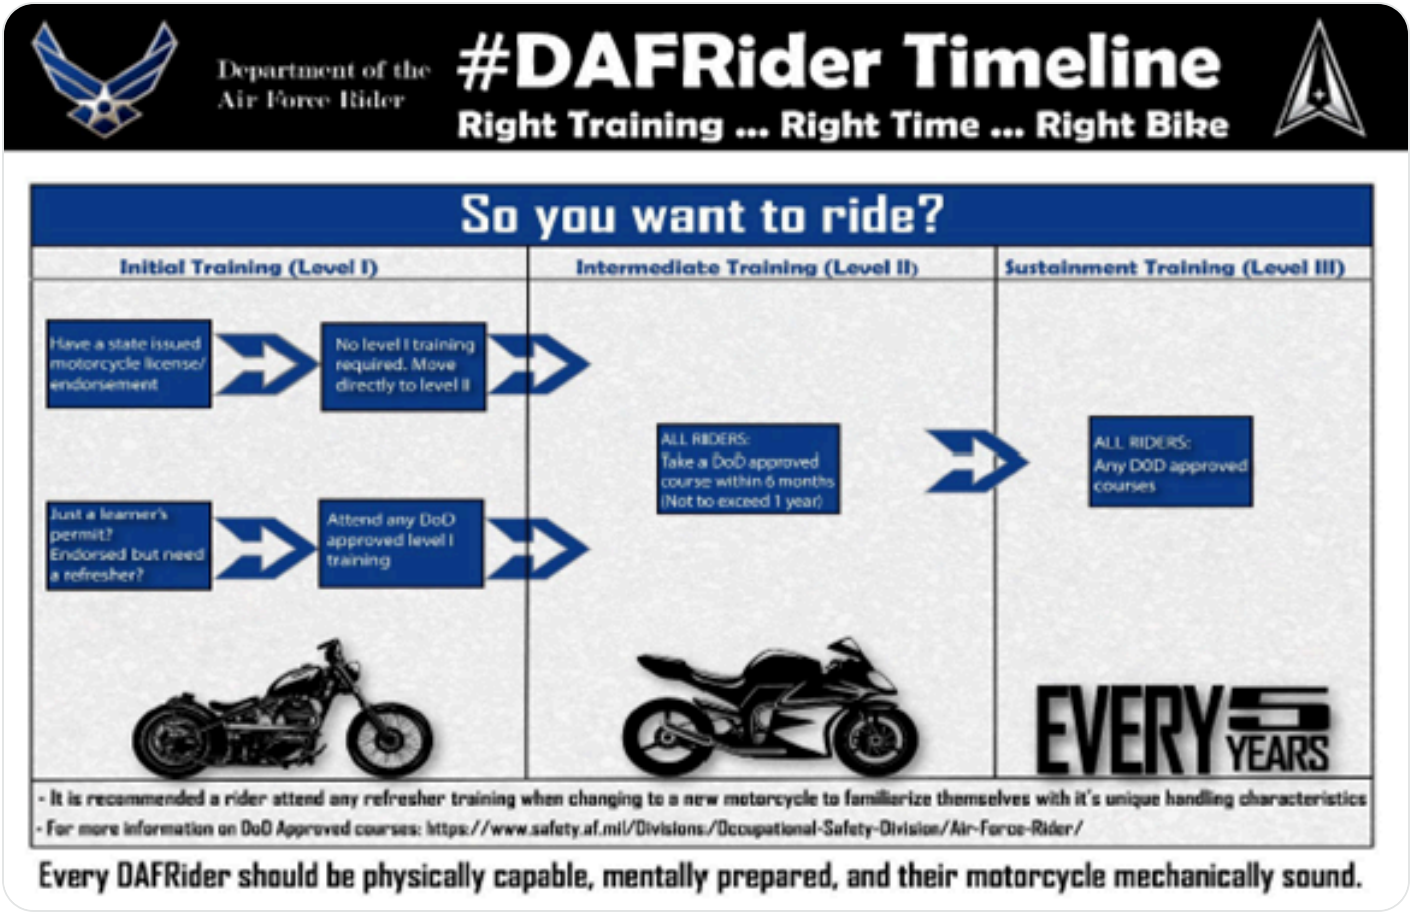

Local Traffic Hazards / Vehicle Notes:
Requirements of Air Force Traffic Safety Program, including mandatory use of seat belts and helmets, speed limits, local traffic hazards, personal risk management and cell phone prohibition while operating a GMV or PMV on base. If Applicable, Discuss Motorcycle Safety Training

Requirements Before Riding A Motorcycle. (AFI 91-202 para. A4.1.9)

Cell phone use while driving is prohibited. If you are driving and you need to take a call, use hands free device or safely pull off to the side of the road, put your hazards lights on and take the call.

All newly assigned and PCS personnel who are motorcycle riders will be required to process through the commander or designated representative. Unit commander or designated MSR(s) will provide an initial briefing to all new or newly assigned motorcycle riders within 30 days from initial assignment, identification as a rider or purchase of a motorcycle.

Motorcycle Safety Representatives / Traffic Contacts:
List unit or group motorcycle safety representatives, traffic safety contacts, and local rider briefing requirements.

No routine-use GVO risk assessment files uploaded.

Reporting Unsafe Equipment, Conditions, or Procedures

Notify the supervisor immediately when unsafe equipment, conditions, or procedures are identified. Personnel may report hazards without fear of retaliation, coercion, discrimination, or reprisal.

- **DAF Form 457:** Use to document and elevate unsafe conditions, equipment, or processes.
- **SAFEREP:** Use the approved mishap or hazard reporting channel for additional reporting when directed by local procedures.

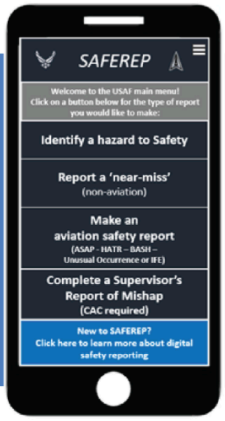

Safety Reporting … All In One Place

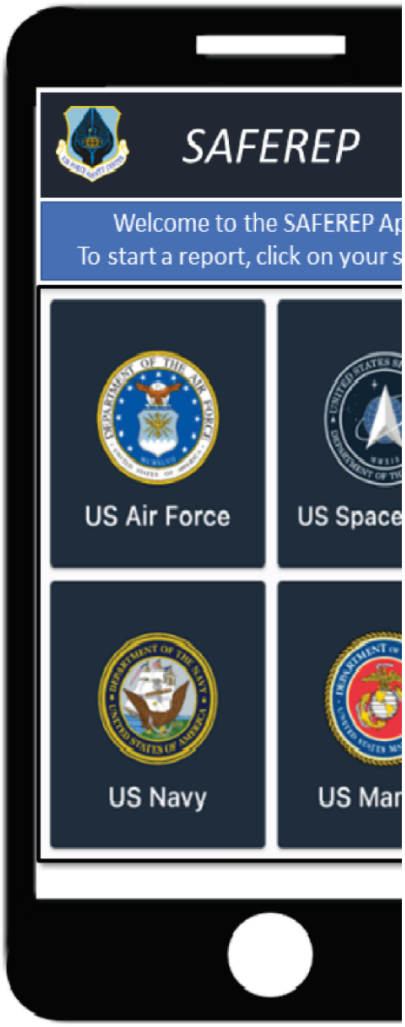

SAFEREP APP!

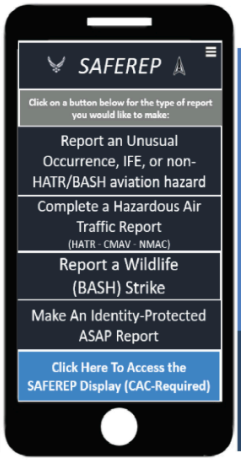

Why Safety Reporting?

Quickly and easily tell safety about safety issues you see

- In the dorms
- At work
- Anywhere on base
- In flight
- While maintaining aircraft
- On the ramp

What to report?

- Dangerous conditions
- "Near miss" events
- Aviation specific reporting
- Cultural issues that could lead to an accident, damage, or injury
- Supervisor mishap report

Report anonymously
Reports go direct to the safety office

New name, new website, new app, and a whole new look

SAFEREP is a web- and app-based way for members from every career field to identify hazards and report near-misses and even some mishaps directly to their safety offices using any computer or mobile device.
